## Alumni Testimonial

### CRYSTAL SANTIFUL

As a 2019 graduate of the University of Baltimore, the Career and Internship Center hold a special place in my heart. The University of Baltimore creates a learning environment inside and outside of the classroom, and the Career and Internship Center really puts the emphasis on the outside of the classroom!

The Career and Internship Center is an office that helps prepare students for employment after graduation. I am a product of many of the resources they provide to students. Working along side my Career coach and mentor Sarah Holliday, and the staff that made it their business to assist me, it is no surprise that I landed in Higher Education.

Now serving as the Outreach Success Advisor, at Pittsburgh Technical College, it is the training and teachings that helped me to get to where I am today. And now it is the passion of those that pushed me that fuels me to want to make the best path for my own students. With one-on-one coaching, resume building workshops, the career closet, assistance with job placement and the willingness to go above and beyond. As a student now higher education professional, the Career and Internship Center is a resource that should not be taken for granted. They truly help you forge your future
