### **Research in Progress**

"Bank CEO Overconfidence and Risk-Taking" (On-Going)

We analyze the contribution of behavioral biases of CEOs, in particular their overconfidence to bank risk-taking.

"Corporate Social Responsibility, Natural Disasters, and Firm Performance" (Planning)

I study whether the natural disasters suffered at the headquarters of a corporation have any effect on the relationship between corporate social responsibility and firm performance.

"Diversification or Monitoring?" (Planning)

We analyze the empirical tradeoff between diversification of institutional funds and their corporate governance initiatives.

"The Changing Incentives of Classified Boards" (On-Going)

I explore the conflicting incentives of classified boards - entrenchment and independence from management, with opposite implications on agency costs and firm performance. Prior studies have focused on an average effect of classified boards across different time periods. I show that the effect of classified boards depends on the time period characterized by different institutional environments to induce either entrenchment or independence from management.

**College Service**

Faculty Advisor, UB Investment Society. (August 2013 - Present).

Committee Member, Undergraduate Curriculum Committee. (February 2012 - May 2012).

Committee Member, Scholarship Continuous Improvement Committee. (September 2008 - May 2009).
