**Course Description:**

The competent use of technology is a vital part of modern law practice. Thirty-seven states already recognize an ethical duty of technology competency, with many more sure to follow. Contrary to what many people believe, routine use of a computer does not lead to the kind of technological competence required in today's legal profession. Students can expect to explore a variety of technology concepts and software with special focus on professional responsibility, case and client management, document management and electronic discovery, information literacy, presentation technology, and office skills.

LAW	795	521	4908	SPECIAL TOPICS IN LAW	Lecture	3

**Course Description:**

This course will explore cybersecurity law beginning with an introduction to the basics of the Internet, core concepts and terms of cybersecurity and a brief overview of the current threat landscape. Following a review of foundational legal principles, the coverage will shift to anti-hacking laws, an overview of government institutions with cybersecurity authorities, state laws, industry specific requirements, privacy-related topics, issues related to network monitoring, public-private cybersecurity partnership, and finally discussion about creation of an incident response guide.
