

## **CMAT 489 Directed Independent Study**

Students wanting to do an Independent Study need to follow the following procedure:

1. Come up with an idea. This may be a paper or a project but must merit enough work to be worthy of 3-credits.
2. Write a formal proposal including:
  - a. General Introduction.
  - b. A brief narrative describing the project.
  - c. A statement of the potential audience.
  - d. Detailed treatment, storyboards, roughs, script, or any support material that shows the outline/structure, design, artistic, and technical choices made.
  - e. A detailed schedule of completion.
3. Submit that proposal to the faculty member you'd like to direct the project. If he/she agrees, submit the proposal with the signature of that faculty member, to the Program Director.
4. If the Program Director approves the project, you'll be cleared to register.
5. Plan on this process taking 1-month.
