Revision history

May 2007

Standard 01.01. This document is up-issued to support CS 1000 Release 5.0. This document reflects the new document number.

November 2006

Standard 5.00. This document is up-issued to reflect an update to Regulatory information.

June 2006

Standard 4.00. This document is issued to support Nortel Communication Server 1000 Release 4.5 software. Added support for new security features.

February 2006

Standard 3.00. This document is issued to support Nortel Communication Server 1000 Release 4.5 software.

January 2006

Standard 2.00. This document is issued to support Nortel Communication Server 1000 Release 4.5 software.

November 2005

Standard 1.00. This document is issued to support Nortel Communication Server 1000 Release 4.5 software.

About the Nortel IP Phone 1140E

Your Nortel IP Phone 1140E brings voice and data to the desktop by connecting directly to a Local Area Network (LAN) through an Ethernet connection.

In this guide, self-labeled line/programmable feature key labels appear beside the keys, and context-sensitive soft key labels appear directly above the keys. Figure 1 shows self-labeled line/programmable feature keys and context-sensitive soft keys.

**Figure 1: Self-labeled line/programmable feature keys and context-sensitive soft keys**

![Self-labeled line/programmable feature keys and context-sensitive soft keys](image)

**Basic features**

Your IP Phone 1140E supports the following features:

- six self-labeled line/programmable feature keys with labels and indicators
- four context-sensitive soft keys

For information about context-sensitive soft keys, see *New in This Release Communication Server Release 5.0* (NN43001-115).
**Note:** Some IP Phone 1140E phones are not configured to support soft key functionality. Consult your system administrator.

- graphical, high-resolution LCD display, backlit, with adjustable contrast
- high-quality speaker phone
- volume control keys for adjusting ringer, speaker, handset, and headset volume
- six specialized feature keys:
  - Quit
  - Directory
  - Message/Inbox
  - Shift/Outbox
  - Services
  - Copy
- six call-processing fixed keys:
  - Mute
  - Handsfree
  - Goodbye
  - Expand
  - Headset
  - Hold
- gigabit Ethernet ports
- built-in gigabit Ethernet switch for shared PC access
- headset jack with an On/Off key
- USB port to support a keyboard or mouse. Powered downstream 1.1-compliant USB hubs are supported, including USB 2.0 hubs, if they offer USB 1.1 backwards compliance.
- automatic network configuration
- Graphical XAS
- hearing aid compatibility
About the Nortel IP Phone 1140E

- wireless headset support using a Bluetooth® 1.2 wireless technology compliant Audio Gateway (Headset Profile, Bluetooth Power Class 2).
- Accessory Expansion Module port to connect the Expansion Module for IP Phone 1100 Series (Expansion Module)

For information about using the Expansion Module, see the *Expansion Module for IP Phone 1100 Series User Guide* (NN43130-101).

Figure 2 shows the IP Phone 1140E.

**Figure 2: IP Phone 1140E**

*Note: If supported by your server, the data message waiting indicator provides a data alert. Contact your system administrator to find out if this feature is available for you.*
About the Nortel IP Phone 1140E

**Telephone controls**

This section describes the controls on your IP Phone 1140E. In some geographic regions, the IP Phone 1140E is offered with key caps that have English text labels. In this document, text in parentheses indicates the labels that appear on the key caps, for example, (Services).

**Context-sensitive soft keys** are located below the display area. The LCD label above each key changes based on the active feature.

When a triangle appears before a soft key label, the feature is active.

Press the **More** key to access the next layer of context-sensitive soft keys (self-labeled).

The keys on either side of the LCD display area are **self-labeled line/programmable feature keys**, with labels on the LCD. These keys also function as **line (DN)** keys.

A steady LCD light beside a line (DN) key indicates that the line is active. A flashing LCD light indicates the line is on hold or the feature is being programmed.

A steady LCD light beside a feature key indicates that the feature is active. A flashing LCD light indicates that the feature is being programmed.
Use the Volume control buttons to adjust the volume of the ringer, handset, headset, speaker, and the Handsfree feature. Press the top button to increase the volume, and press the bottom button to decrease the volume.

Press the Mute key to listen to the receiving party without transmitting. Press the Mute key again to return to two-way conversation. The Mute key applies to handsfree, handset, and headset microphones.

The Mute LED indicator, located on the Mute key, flashes to indicate that the microphone is muted.

Press the Handsfree key to activate handsfree.

The Handsfree LED indicator, located on the Handsfree key, lights to indicate when handsfree is active.

Use the Navigation keys to scroll through menus and lists appearing on the LCD display screen. The outer part of this key cluster rocks for up, down, left, and right movements.

Use Up and Down to scroll up and down in lists, and the Left and Right keys to position the cursor. In some dialog boxes that appear on your phone, you can also use the Left and Right keys to select editable fields; press the Right key to select the field below the current selection, or the Left key to select the one above.
Use the **Enter** key, at the center of the Navigation key cluster, to confirm menu selections.

In most menus, you can use the **Enter** key instead of the **Select** soft key.

Press the **Hold** key to put an active call on hold. Tap the flashing line (DN) soft key to return to the caller on hold.

Use the **Expand** key to access external server applications

Press the **Headset** key to answer a call using the headset or to switch a call from the handset or handsfree to the headset.

The Headset LED indicator, located on the **Headset** key, lights to indicate that the headset is in use.

Press the **Headset** key twice to open the Bluetooth Setup menu.

If Bluetooth wireless technology is not enabled on your phone, this menu is not available.

Use the **Goodbye** key to terminate an active call.
When a message is waiting, the red **Visual Alerter/Message Waiting indicator** lights. Also, when the ringer sounds, this indicator flashes.

When your IP Phone 1140E firmware is being updated, the blue **Feature Status Lamp** indicator flashes.

To find out if additional features are supported for this lamp, contact your administrator.

Press the **Copy** Key to copy entries to your Personal Directory from other lists, such as the Caller List, Redial List, and Corporate Directory.

Press the **Quit/Stop** key to exit an active menu or dialog. Pressing the **Quit/Stop** key does not affect the status of active calls.

Press the **Shift/Outbox** key to toggle between two feature key pages and to access an additional six lines/features.

This function is not available on all phones; consult your system administrator.

Press the **Message/Inbox** key to access your voice mailbox.

This function is not available on all phones; consult your system administrator.
Press the **Directory** key to access directory services.

Press the **Services** key and use the navigation keys to access the following items:

- **Telephone Options:**
  - Volume adjustment
  - Contrast adjustment
  - Language
  - Date/Time
  - Display diagnostics
  - Local Dialpad Tone
  - Set Info
  - Diagnostics
  - Call Log Options
  - Ring type
  - Call Timer
  - On hook default path
  - Change Feature Key Label
  - Name Display Format
  - Live Dialpad
• Password Admin:
  — Station Control Password
  The Password Admin menu is not available on all IP Phone 1140E phones. Consult your system administrator.

• Display Network Diagnostics Utilities
  Only your system administrator or service provider can use Display Network Diagnostics Utilities to perform Internet diagnostics.

• Virtual Office Login and Virtual Office Logout (if Virtual Office is configured)

• Test Local Mode and Resume Local Mode (if Media Gateway 1000B is configured)

Press the Services key to exit from any menu or menu item.

Press the Services key twice to access the Local Tools menu, and use the navigation keys to access the following items:

• 1. Preferences
• 2. Local Diagnostics
• 3. Network Configuration
• 4. Lock Menu

If you attempt to access the Local Tools menu and a dialog box appears prompting you for a password, contact your system administrator. Your system administrator can establish a password for the Local Tools menu.
### Telephone display

Your IP Phone 1140E has three display areas:

- The upper display area provides labels for the six self-labeled line/programmable feature key labels.
- The middle display area contains single-line information for items such as caller number, caller name, Call Timer, feature prompt strings, user-entered digits, date and time information, and IP Phone information.
- The lower display area provides labels for the four context-sensitive soft keys.

Figure 3 shows an idle LCD screen.

**Figure 3: IP Phone 1140E LCD screen**

![Image of IP Phone 1140E LCD screen with labels for upper, middle, and lower display areas]

### Call features and Flexible Feature Codes

Some features are not available on all IP Phones. Call features and Flexible Feature Codes (FFC) must be assigned to your IP Phone and supported by system software. Contact your system administrator to configure these features and codes on your IP Phone.
Security features

The following security features are available on your IP Phone 1140E:

• Using encrypted calling
• Managing your Station Control Password (SCPW)

Using encrypted calling

Your IP Phone 1140E supports secure communication using SRTP media encryption. If the feature is enabled, a security icon (🔒) appears on the screen when your call is secured using SRTP media encryption. Contact your system administrator to find out if this feature is available for your use.

Managing your Station Control Password (SCPW)

Your Station Control Password (SCPW) enables the following security features:

• Electronic Lock to prevent others from making calls from your IP Phone
• password-protected IP Phone features (for example, Personal Directory, Redial List, and Callers List)

Your system administrator defines your initial SCPW. Contact your system administrator for detailed information.

To change your SCPW:

1. Press the Services key.

(Services)

2. Press the Up/Down keys to scroll and highlight Password Admin.
3. Press the **Enter** key.

4. Use the dialpad to enter your password at the prompt.

5. Press the **Up/Down** keys to scroll and highlight **New Password**.

6. Press the **Enter** key.

7. Use the dialpad to enter the new password.

8. Press the **Select** soft key to accept the new password.

   If you are locked out of your IP Phone 1140E, or if you forget your SCPW, contact your system administrator.

*Note:* The default configuration for Password Protection is off.

**To turn Password Protection on or off:**

1. Press the **Directory** key.
2. Press the **Up/Down** navigation keys to scroll and highlight **Change Protection Mode**.

3. Use the dialpad to enter your password (if Password Protection is enabled).

4. Press the **Enter** soft key.

5. Press the **Up/Down** navigation keys to scroll and highlight one of the following:
   - **Enable Password Protection**
   - **Disable Password Protection**

6. Choose one of the following soft keys:
   - **Yes** to accept the selection
   - **No** to return to the Directory menu

7. Press the **Done** soft key.
Entering and editing text

You can enter and edit text on your IP Phone 1140E using the following methods:

- “Entering text using the IP phone dialpad” on page 24
- “Entering text using the USB keyboard” on page 25
- “Editing text using the soft keys” on page 25

The use of any of these methods for text entry or editing depends on the application. Table 1 shows the applications and input devices that you can use for text entry.

**Table 1: Application text entry**

<table>
<thead>
<tr>
<th>For: Call Server-related applications (for example, changing feature key labels, adding personal directory entries, or dialing)</th>
<th>Use: Dialpad USB keyboard for numeric entries only</th>
</tr>
</thead>
<tbody>
<tr>
<td>Graphical applications</td>
<td>USB keyboard</td>
</tr>
<tr>
<td>Local Tools menu</td>
<td>USB keyboard Dialpad for numeric entries</td>
</tr>
</tbody>
</table>

**Entering text using the IP phone dialpad**

You can use the dialpad to enter text when you use features such as Personal Directory, Redial List, and Callers List. Use the dialpad in conjunction with the soft keys.

For example, if you want to enter the letter A, press the number 2 key once. If you want to enter the letter C, press the number 2 key three times. No letters are associated with the number 1 or the 0 keys.
Entering text using the USB keyboard

You can use the USB keyboard, when connected, to enter text in the tools and graphical applications.

For number entry in phone applications (for example, when dialing), you can use the keyboard to enter digits (0–9), as well as * and #. Other characters are ignored.

When on a call, you can use the function keys (f1, f2, f3, f4, f5, f6, f7, and f8) to control the IP Phone. Table 2 shows the function keys and their associated action during IP Phone calls.

Table 2: USB keyboard function keys during IP Phone calls

<table>
<thead>

Editing text using the soft keys

You can use soft keys to edit text when you use features such as Personal Directory, Redial List, and Callers List. Use the soft keys in conjunction with the dialpad.
To edit an entry in your Personal Directory, press the **Directory** key, and select the desired entry from your Personal Directory.

**To edit text with the soft keys:**
1. Press the **Edit** soft key.
2. Press the **Left/Right** navigation keys to move through the text.
3. Select the appropriate editing soft key for the operation you want to perform.
4. If the character you want is not visible, press the **More** soft key to access the next layer of soft keys.
5. To add non-alphanumeric symbols, press the **Symbol** soft key, and perform the following:
   a. Press the **Up** navigation key to access the symbols.
   b. Press the **Left/Right** navigation keys to move to a specific symbol.
   c. Press the **Choose** soft key to select a symbol.
6. Press the **Next** soft key to submit your changes.

When you are editing text using the soft keys, various commands are available on the soft keys to help you, as described in Table 3.

Connecting the components

Figure 4 shows connections on the IP Phone 1140E.

**Figure 4: IP Phone 1140E connections**

![Diagram of IP Phone 1140E connections]

**WARNING**
Ensure that the protective rubber cap on the Accessory Expansion Module port is in place when the port is not in use. Connecting anything other than the proper Expansion Module for IP Phone 1100 Series connector to this port can cause damage to the IP Phone.
Before you begin

<table>

Connecting the components of the phone

<table>
<thead>
<tr>
<th>WARNING</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Your IP Phone 1140E is shipped with the base locked in position. To avoid damaging your phone, press the wall-mount lever, located just under the Handsfree key as indicated in Figure 5 on page 29, to release the base and pull it away from the phone.</td>
<td></td>
</tr>
</tbody>
</table>
Use the following steps to connect the components of your phone.

1. Remove the stand cover. Pull upward on the center catch as indicated in Figure 6 on page 30, and remove the stand cover. The cable routing tracks are now accessible.
2. Connect the AC power adapter (optional). Connect the adapter to the AC adapter jack in the bottom of the phone. Form a small bend in the cable, and then thread the adapter cord through the channels in the stand.

**WARNING**

Use your IP Phone 1140E with the approved Nortel AC Adapter (model #N0089601).

**Note 1:** Your IP Phone 1140E supports both AC power and Power over Ethernet options, including IEEE 802.3af standard power. To use local AC power, the optional AC adapter can be ordered separately. To use Power over Ethernet, where power is delivered...
over the CAT-5 cable, the LAN must support Power over Ethernet, and an AC adapter is not required.

**Note 2:** You must use CAT-5e (or later) cables if you want to use gigabit Ethernet.

3. Install the handset. Connect the end of the handset cable with the short straight section into the handset. Connect the end of the handset cable with the long straight section to the back of the phone, using the RJ-9 handset jack marked with the symbol +. Form a small bend in the cable, and then thread the handset cord through the channels in the stand so that it exits behind the handset on the right side, in the Handset cord exit in the stand base marked with the symbol +, as shown in Figure 7 on page 32.

4. Install the headset (optional). If you are installing a headset, plug the connector into the RJ-9 headset jack marked with the symbol (on the back of the phone, and thread the headset cord along with the handset cord through the channels in the stand, so that the headset cord exits the channel marked with the symbol (.

5. Install the Ethernet cable. Connect one end of the supplied Ethernet cable to the back of your phone using the RJ-45 connector marked with the symbol $, and thread the network cable through the channel marked with the symbol $.

6. If you are connecting your PC through the phone, you will require a second CAT5 cable. Only one cable is included with the IP Phone 1140E package. Install the Ethernet cable connecting the PC to the phone (optional). Connect one end of the PC Ethernet cable to your phone using the RJ-45 connector marked with the symbol @ and thread it through the channel marked with the symbol @. Connect the other end to the LAN connector on the back of your PC.

7. Install additional cables. If applicable, plug in optional USB devices. Connect the Ethernet cable to the LAN Ethernet connection. If you are using an AC power adapter, plug the adapter into an AC outlet.
8. Wall-mount your phone (optional). Your IP Phone 1140E can be mounted either by: (Method A) using the mounting holes on the bottom of the phone stand, or (Method B) using a traditional-style wall-mount box with RJ-45 connector and 15-cm (6-inch) RJ-45 cord (not provided).

*Complete steps 1-7, as needed, before you wall-mount your phone:*

**Method A:** Press the wall-mount lever, and pull the phone away from the stand, as shown in Figure 5 on page 29. Using the stand cover (the part you removed in step 1), mark the wall-mount holes by pressing the bottom of the stand cover firmly against the wall in the location where you wish to install the phone. Four small pins on the bottom of the stand cover make marks on the wall. Use the marks as a guideline for installing the wall-mount screws (not provided). Install the screws so that they protrude 3 mm (1/8 inch) from the wall, and then install the phone stand mounting holes over the screw heads. You may need to remove the phone from the wall to adjust the lower screws. When the lower screws are snug, install the phone on the
mounting screws, and then tighten the top screws. See Figure 7 on page 32.

**Method B:** Attach the 15-cm (6-inch) CAT5e cable, position the stand over the mounting rivets, and slide the phone down the wall so that the rivets fit into the slots on the stand, indicated in Figure 7 on page 32 (Method B).

9. Replace the stand cover. Ensure that all cables are neatly routed and press the stand cover into place until you hear a click.

10. Put the phone in the wall-mount position (optional). If you wall-mounted your phone, put it in the wall-mount position by holding the Tilt Lever and pressing the phone towards the base until the phone is parallel with the base. Release the Tilt Lever and continue to push the phone towards the base until you hear an audible click. Ensure the phone is securely locked in position.
Configuring Telephone Options

Your IP Phone 1140E Services menu lists the following submenus:

- The **Telephone Options** menu enables you or your system administrator to configure IP Phone preferences. The **Telephone Options** menu offers the options shown in Figure 8.

- The **Password Admin** menu enables you or your system administrator to change the Station Control Password (SCPW).

- The **Virtual Office Login** and **Test Local Mode** (for branch office) menus are listed when an IP Phone 1140E Class of Service is configured for Virtual Office and branch office. (For more information, see “Using Virtual Office” on page 131).

**Note:** The **Password Admin**, **Virtual Office Login**, and **Test Local Mode** menus are not available on all IP Phone 1140E phones. Consult your system administrator.

**Figure 8: Telephone Options menu**

</tbody>
</table>

**Note:** When an option has a sublist, an ellipsis (...) appears after the option.
Using the Telephone Options menu

Use the **Telephone Options** menu to access the following:

- “Adjusting the volume” on page 36
- “Adjusting the display screen contrast” on page 37
- “Selecting a language” on page 38
- “Selecting date and time format” on page 39
- “Accessing display diagnostics” on page 40
- “Choosing a local dialpad tone” on page 40
- “Viewing IP Phone information” on page 41
- “Diagnostics” on page 42
- “Configuring call log options” on page 43
- “Choosing a ring type” on page 47
- “Enabling or disabling Call Timer” on page 48
- “Enabling OnHook Default Path” on page 49
- “Changing feature key labels” on page 49
- “Configuring the name display format” on page 51
- “Configuring Live Dialpad” on page 52

**To use the Telephone Options menu:**

1. Press the **Services** key.

2. Press the **Up/Down** navigation keys to scroll and highlight **Telephone Options**.

3. Press the **Enter** key.
4. Press the **Up/Down** navigation keys to scroll and highlight an option (for example, **Language**…).

5. Press the **Enter** key. The display provides information required to adjust your selection.

6. Choose one of the following:
   - Press the **Select** soft key to save changes and return to the **Telephone Options** menu.
   - Press the **Cancel** soft key to keep existing configurations.

---

**Adjusting the volume**

To adjust the volume, press the **Services** key and select **Telephone Options**, and select **Volume adjustment**…

**To adjust the volume:**

1. Press the **Up/Down** navigation keys to scroll and highlight one of the following:
   - **Ringer**
   - **Handset listen**
   - **Handsfree listen**
   - **Headset listen**
   - **Buzzer**

2. Press the **Enter** key.
3. To increase or decrease the volume, do one of the following:
   — Press the **Down** and **Up** soft keys.
   — Press the **Up/Down** navigation keys.

4. Choose one of the following:
   — Press the **Select** soft key to save the volume level and return to the **Telephone Options** menu.
   — Press the **Cancel** soft key to keep existing configurations.

**Adjusting the display screen contrast**

To adjust the LCD screen contrast, press the **Services** key, select **Telephone Options**, and select **Contrast adjustment**.

You can also adjust the contrast using the Local Tools menu; Nortel recommends that you use the control in the Telephone Options menu.

**Note:** If you have an Expansion Module for IP Phone 1100 Series attached to your IP Phone, adjusting the IP Phone LCD screen contrast also adjusts the display screen contrast configuration for the Expansion Module for IP Phone 1100 Series.
To adjust the display screen contrast:

1. To increase or decrease the display contrast level, choose one of the following:
   — Press the Down and Up soft keys.
   — Press the Up/Down navigation keys.

2. Choose one of the following:
   — Press the Select soft key to save the changes and return to the Telephone Options menu.
   — Press the Cancel soft key to keep existing configurations.

Selecting a language

The display is available in multiple languages. To choose a language, press the Services key, select Telephone Options, and select Language...

This language setting controls the language used by features on your phone only. To set the language used elsewhere on your phone, press Services twice, select Preferences, and select Language.
To select a language:

1. Press the **Up/Down** navigation keys to scroll and highlight the desired language (for example, German [Deutsche]).

   **Note:** Some languages may not be installed on your IP Phone. Contact your system administrator for more information about available languages.

2. Choose one of the following:
   - Press the **Select** soft key to save the desired language and return to the **Telephone Options** menu.
   - Press the **Cancel** soft key to keep existing configurations.

**Selecting date and time format**

Several date and time formats are available. Formats are based on the 12-hour and 24-hour clocks. To select the date and time format, press the **Services** key, select **Telephone Options**, and select **Date/Time**…

To select a date and time format:

1. Press the **Up/Down** navigation keys to scroll and highlight the desired format. Sample formats appear on the upper-right side of the display area.
Configuring Telephone Options

Accessing display diagnostics

The Display diagnostics option tests the IP Phone display screen and indicator lights. To access Display diagnostics, press the Services key, select Telephone Options, and select Display diagnostics.

To use Display diagnostics:

1. Press the Up/Down navigation keys to scroll through the list to view display capabilities.

2. Press the Cancel soft key to return to the Telephone Options menu.

Choosing a local dialpad tone

The Local DialPad Tone option produces Dual-Tone Multi-Frequency (DTMF) sounds, a single tone, or no sound when you press a key on the dialpad. To choose a local dialpad tone, press the Services key, select Telephone Options, and select Local DialPad Tone.
To choose a local dialpad tone:

1. Press the Up/Down navigation keys to scroll and highlight one of the following dialpad tones:
   - **None** to disable all tones
   - **Short Click** to enable a single tone for all keys
   - **DTMF** to turn on a separate DTMF tone for each key

2. Choose one of the following:
   - Press the Select soft key to save the tone selection and return to the Telephone Options menu.
   - Press the Cancel soft key to keep existing configurations.

**Viewing IP Phone information**

The Set Info option displays the following phone-specific information:

- General Info
- Set IP Info
- Ethernet Info
- Server Info
- Encryption Info

To view IP Phone information, press the Services key, select Telephone Options, and select Set Info.
To view IP Phone information:

1. Press the **Up/Down** navigation keys to scroll through the list to view IP Phone information.

2. Press the **Cancel** soft key to return to the **Telephone Options** menu.

**Diagnostics**

The Diagnostics option displays the following phone-specific information:

- Diag Tools (Ping, do Route Traces)
- EtherStats (Speed, Auto Neg, CRC Errors, Collision)
- IP Stats (Packet Info)
- RUDP Stats (Message receive or transmit)
- QOS Stats

To view diagnostic information, press the **Services** key, select **Telephone Options**, and select **Diagnostics**.

To view diagnostic information:

1. Press the **Up/Down** navigation keys to scroll through the list of diagnostic information.

2. Press the **Cancel** soft key to return to the **Telephone Options** menu.
Configuring call log options

Use the call log option to configure the following preferences:

• “Configuring the Callers List log” on page 43
• “Configuring New Call Indication” on page 43
• “Configuring Preferred Name Match” on page 44
• “Configuring Area Code Setup” on page 45

Configuring the Callers List log

You can configure the Callers List to log all incoming calls or only unanswered calls. The default configuration is Log all calls. To log only unanswered calls, press the Services key, select Telephone Options, and select Call Log Option.

To log only unanswered calls:

1. Press the Up/Down navigation keys to scroll and highlight the Log Mode option.

2. Press the Enter key.

3. Press the Up/Down navigation keys to scroll and highlight Log unanswered calls.

4. Choose one of the following:
   — Press the Select soft key to save the configuration.
   — Press the Cancel soft key to keep existing configurations.

Configuring New Call Indication
You can configure your IP Phone 1140E to display a message to indicate that a new incoming call was received. The default configuration is On. To configure new call indication, press the Services key, select Telephone Options, and select Call Log Option.

To configure New Call Indication:

1. Press the Up/Down navigation keys to scroll and highlight the Log Mode option.

2. Press the Enter key.

3. Press the Up/Down navigation keys to scroll and highlight New Call Indication.

4. Press the Enter key.

5. Press the Up/Down navigation keys to scroll and highlight one of the following:
   - New call indication off
   - New call indication on

6. Choose one of the following:
   - Press the Select soft key to save the configuration.
   - Press the Cancel soft key to keep existing configurations.

Configuring Preferred Name Match
You can configure your IP Phone 1140E to display the name of the caller as defined in your Personal Directory. The default configuration is Off. To configure Preferred Name Match, press the Services key, select Telephone Options, and select Call Log Option.

To configure Preferred Name Match:

1. Press the Up/Down navigation keys to scroll and highlight Preferred Name Match.
2. Press the Enter key.
3. Press the Up/Down navigation keys to scroll and highlight one of the following:
   — Preferred name match on
   — Preferred name match off
4. Choose one of the following:
   — Press the Select soft key to save the configuration.
   — Press the Cancel soft key to keep existing configurations.

Configuring Area Code Setup

Use the Area Code Setup menu to save up to three area codes. When an incoming call arrives with an area code that matches one of the three stored area codes, the incoming call number is reordered to display the phone number followed by the area code (as opposed to the area code followed by the phone number).

This reordering is also performed when you scroll through your Callers List. To configure area codes, press the Services key, select Telephone Options, and select Call Log Option.
Configuring Telephone Options

To configure default area codes (maximum of three):

1. Press the Up/Down navigation keys to scroll and highlight Area Code Setup.

2. Press the Enter key.

3. Press the Up/Down navigation keys to scroll and highlight one of the following:
   - Area Code # 1
   - Area Code # 2
   - Area Code # 3

4. Press the Enter key.

5. Use the dialpad to enter the number at the prompt.

6. Choose one of the following:
   - Press the Select soft key to save the configuration.
   - Press the Cancel soft key to keep the existing configurations.

To edit area code display:

1. Press the Up/Down navigation keys to scroll and highlight Area Code Setup.
Choosing a ring type

The Ring type… option configures the IP Phone ring tone. To choose a ring type, press the Services key, select Telephone Options, and select Ring type…

To select a ring type:

1. Press the Up/Down navigation keys to scroll and highlight one of the ring types.
Enabling or disabling Call Timer

The call timer measures how long you are on each call. To enable Call Timer, press the Services key, select Telephone Options, and select Call Timer.

To enable or disable Call Timer:

1. Choose one of the following:
   - To turn on the call timer, press the On soft key.
   - To turn off the call timer, press the Off soft key.

2. Choose one of the following:
   - Press the Select soft key to save the configuration and return to the Telephone Options menu.
   - Press the Cancel soft key to keep existing configurations.
Enabling OnHook Default Path

The OnHook Default Path option allows you to choose whether to use a headset or the Handsfree feature to operate your IP Phone while it is on-hook. To enable OnHook Default Path, press the Services key, select Telephone Options, and select OnHook Default Path.

To enable OnHook Default Path:

1. Press the Up/Down navigation keys to highlight one of the following:
   - Handsfree enable
   - Headset enable

2. Choose one of the following:
   - Press the Select soft key to save the default path and return to the Telephone Options menu.
   - Press the Cancel soft key to keep existing configurations.

Changing feature key labels

The Change feature key label option renames the label displayed next to each feature key or restores the default labels to the keys (collectively or individually). To rename feature key labels, press the Services key, select Telephone Options, and select Change feature key labels.

Note: If a feature key is configured as an auto-dial key, the label does not change if the auto-dial key configuration changes.

To rename the labels:

1. Press the Enter key.
2. Press the feature key that you are changing.

   If you press a prime DN key, an error message appears.

3. Enter the new information for the feature key label. To enter special characters, press the Up navigation key. For information about entering text, refer to “Entering text using the IP phone dialpad” on page 24.

4. Choose one of the following:
   — Press the Select soft key to save the changes and return to the Telephone Options menu.
   — Press the Cancel soft key to keep existing configurations.

To restore the default labels:

To restore feature key labels, press the Services key, select Telephone Options, and select Change feature key labels.

5. Press the Enter key.
6. Use the **Up/Down** navigation keys to scroll and highlight one of the following:
   a. Restore all key labels
      — Press the **Yes** soft key to change all feature keys to default values.
   b. Restore one key label
      — Press the **Select** soft key.
      — Press the feature key.
      — Press the **Yes** soft key to change the selected feature key label to the default value.

   **Note:** If labels are changed to default values, you cannot undo the change. The label configurations must be reentered.

**Configuring the name display format**

You can configure your IP Phone 1140E to display the name of the incoming calling party in the following formats:

- first name, last name
- last name, first name

To configure name display format, press the **Services** key, select **Telephone Options**, and select **Name Display Format**.

**To configure name display format:**

1. Press the **Up/Down** navigation keys to scroll and highlight **Name display format**.
Configuring Telephone Options

2. Press the Enter key.

3. Press the Up/Down navigation keys to scroll and highlight one of the following:
   — first name, last name
   — last name, first name

4. Choose one of the following:
   — Press the Select soft key to save the configuration.
   — Press the Cancel soft key to keep existing configurations.

**Configuring Live Dialpad**

The Live Dialpad option activates the Primary DN key when you make a call by dialing a directory number on the dialpad without picking up the handset or pressing the handsfree key.

To configure Live Dialpad, press the Services key, select Telephone Options, and select Live Dialpad.

To configure Live Dialpad:

1. Press the Up/Down navigation keys to scroll and highlight Live Dialpad.

2. Press the Enter key.
3. Press the Up/Down navigation keys to scroll and highlight one of the following:
   — On
   — Off (default)

4. Choose one of the following:
   — Press the Select soft key to save the configuration.
   — Press the Cancel soft key to keep existing configurations.
Configuring Local Menu options

**Note:** Many of the options discussed in this section are for administrator use only. Do not make any changes unless instructed by an administrator.

Your system administrator can establish a password for the Local Tools menu. When the password is enabled, a password prompt dialog box appears when you attempt to access this menu. If this happens, contact your system administrator.

Your IP Phone 1140E has both local and server-based options. Press the Services key twice to access the Local Tools menu, which is organized into the following submenus:

- “Using the 1. Preferences submenu” on page 56
- “Using the 2. Local Diagnostics submenu” on page 69
- “Using the 3. Network Configuration menu” on page 70
- “Using the 4. Lock Menu” on page 70

If a menu entry has a number in front of it, you can select that entry by pressing the associated key on the dialpad. For example, in the Local Tools menu, you can access 2. Local Diagnostics by pressing the 2 key on the dialpad.

The function of some keys on the IP Phone varies depending on the situation. The key functions in the menus are described in Table 4.

**Table 4: Navigation key functions in menus (Part 1 of 2)**

<table>
<thead>
<tr>

Configuring Local Menu options

If you are using a USB mouse, you can right-click on the Telephony screen to open the Local Tools menu, and click on an item to select it.

Using the 1. Preferences submenu

The Local Tools menu 1. Preferences submenu offers the following choices:

- “Changing 1. Display Settings” on page 56
- “Changing 2. Language” on page 57
- “Configuring 3. Bluetooth” on page 58

Changing 1. Display Settings

The Display Settings menu provides access to two tools: Contrast and Sleep. Use the Contrast tool to alter the physical settings of the display. Use the Sleep tool to control how long the display remains lit if the phone is inactive.

*Note:* Changes you make to contrast in this menu are lost if the phone is reset. To avoid losing your changes, Nortel recommends that you use the Contrast Adjustment control in the Telephone Options menu.

To adjust Contrast or Sleep settings, press the Services key twice to open the Local Tools menu, press the 1 key on the dialpad to select 1. Preferences, and press the 1 key on the dialpad to select 1. Display Settings.

---

Table 6: Navigation key functions in Edit mode (Part 2 of 2)

<table>
<thead>
<tr>
<th>Key</th>
<th>Function</th>
</tr>
</thead>
<tbody>
<tr>
<td>Enter key</td>
<td>Select the highlighted item in the Exit edit mode box</td>
</tr>
<tr>
<td>Enter characters or digits on the dialpad</td>
<td>Insert characters or digits at the current cursor position</td>
</tr>
</tbody>
</table>

If you are using a USB mouse, you can right-click on the Telephony screen to open the Local Tools menu, and click on an item to select it.

Using the 1. Preferences submenu

The Local Tools menu 1. Preferences submenu offers the following choices:

- “Changing 1. Display Settings” on page 56
- “Changing 2. Language” on page 57
- “Configuring 3. Bluetooth” on page 58

Changing 1. Display Settings

The Display Settings menu provides access to two tools: Contrast and Sleep. Use the Contrast tool to alter the physical settings of the display. Use the Sleep tool to control how long the display remains lit if the phone is inactive.

*Note:* Changes you make to contrast in this menu are lost if the phone is reset. To avoid losing your changes, Nortel recommends that you use the Contrast Adjustment control in the Telephone Options menu.

To adjust Contrast or Sleep settings, press the Services key twice to open the Local Tools menu, press the 1 key on the dialpad to select 1. Preferences, and press the 1 key on the dialpad to select 1. Display Settings.
To adjust Contrast or Sleep settings:

1. Press the **Up/Down** arrow keys to scroll and highlight one of the following:
   - **Contrast**
   - **Sleep**

   Sleep appears in the format xxx, where xxx is a time in minutes or hours.

2. Press the **Enter** key.

3. Press the **Up/Down** arrow keys to increase or decrease the selected value.

   Available values for Sleep are as follows:
   - 5m (5 minutes)
   - 15m (15 minutes)
   - 30m (30 minutes)
   - 1h (1 hour — default)
   - 2h (2 hours)
   - Never (screen does not go black)

   **Note:** Extending the sleep time, or setting it to Never, reduces the life span of the display screen.

4. Press the **Exit** soft key to exit to the main display. Changes are saved automatically.

### Changing 2. Language

Use the Preferences menu item to configure local preferences. Use the **Language** tool to select the language used on your phone.
Configuring Local Menu options

Note: This language setting controls the language used in the local menus on your phone only. To select the language used by features on your phone, press the Services key, select Telephone Options, and select Language...

To select the language used in the local menus, press the Services key twice to open the Local Tools menu, press the 1 key on the dialpad to select 1. Preferences, and press the 2 key on the dialpad to select 2. Language.

To select the language used in local menus:

1. Press the Up/Down navigation keys to scroll and highlight the desired language (for example, German [Deutsche]).

2. Choose one of the following:
   — Press the Select soft key to save the desired language and return to the Telephone Options menu.
   — Press the Cancel soft key to keep existing configurations.

3. Press the Exit soft key to exit to the main display. Changes are saved automatically.

Configuring 3. Bluetooth

Your IP Phone 1140E is equipped with a radio system to support Bluetooth wireless technology enabled headsets. Double press the Headset key to open the Bluetooth Setup dialog box. You must be familiar with the operation of the navigation keys to work in the Bluetooth Setup dialog box; see the Navigation keys description on page 15.

The Bluetooth Setup menu entry is not available on all phones. If the Bluetooth Setup menu entry appears dimmed, or fails to open when you
double press the Headset key, the feature is not enabled on your phone. Before you can use a wireless headset with your phone, the feature must be enabled by the system administrator. Contact your administrator to find out if Bluetooth wireless technology functionality is available for your use.

_Note:_ Nortel recommends that you not pair more than one headset of the same model, because they have identical names in the Paired list.

**To pair a wireless headset with your phone:**

1. Double-press the **Headset** key to open the Bluetooth Setup dialog box.
   
The **Enable Bluetooth** check box is highlighted.
   
   If the Bluetooth Setup menu fails to open when you double press the Headset key, Bluetooth wireless technology feature is not enabled on your phone. Contact your administrator.

2. Press the **Enter** key to activate Bluetooth wireless technology.
   
   A check mark appears to indicate that the feature is activated. The message “BT Enabled” appears at the bottom of the display.

3. Put your Bluetooth technology headset in its pairing or search mode. The procedure for doing this can be different for each headset. Refer to the documentation that accompanied your headset, or contact the vendor.
4. **Search devices.**
   
a. Ensure that your headset is in **Pairing or Search Mode.**
   
b. Press the **Right** navigation key twice, and highlight the **Search** button, displayed next to the Search Devices item.
   
c. Press the **Enter** key.

   The message "Searching...." appears. It can take up to two minutes for the search to complete.

   If the search is successful, the message "Search Completed Found Device(s)" appears, and a list of devices that support Bluetooth wireless technology appears in the **Found**: list.

   d. Choose one of the following:
      
      — If the search is successful, proceed to step 5.
      
      — If the search is not successful, the message "Search completed. No device found" appears. If this happens, or if the headset times out and exits search/pairing mode, power off the headset, and repeat steps 3 and 4.

   If pairing is still unsuccessful, pair the phone to another wireless headset, or contact the headset vendor.
5. When the name of your headset appears in the Found: box, press the Stop soft key or wait for the search to finish. When the search is complete, the message "Search Completed Found Device(s)" appears.

6. Choose one of the following:

- If the name of your headset appears in the Found: box, proceed to step 7.

- If your headset is not displayed in the Found: box, select your headset from the list, as follows:

  a. Press the Right navigation key one or more times to highlight the Found: box. Press the Enter key to start the edit mode.

  b. Press the Down navigation key to open the Found: list. Press the Up/Down navigation keys to scroll and highlight your headset.

  c. Press the Enter key to select the headset and close the list. Press the Enter key to exit edit mode.
7. Press the **Right** navigation key one or more times to highlight the **Pair** button (next to the Pair Device item) and press the **Enter** key.

   a. A dialog box appears, with the prompt "Enter PIN#".

   b. Use the phone dialpad to enter the PIN for the wireless headset and press the **Enter** key.

Check your headset documentation to find its PIN (sometimes called a passkey). Typically this value is 0000.
8. Choose one of the following:

- If the headset is successfully paired with your phone, proceed to step 9. To verify that the pairing was successful, ensure that the headset appears in the list next to the Paired: item. If pairing is successful, the message "Pair completed" also appears at the bottom of the screen.

- If the headset is not successfully paired with your phone, an error message appears at the bottom of the screen. If an error message appears:
  - Confirm that the wireless headset is still in search/pair mode.
  - If the headset timed out and exited search/pairing mode, put the headset in pairing mode, as discussed in step 3, and repeat step 7.
  - Check that you are using the correct PIN and repeat step 7.
9. Choose one of the following:

- If the name of your headset appears in the **Paired**: box, proceed to step 10.

- If more than one device is paired, and the one you wish to use is not shown in the **Paired**: box, navigate to the one you want, as follows:
  
  a. Press the **Right** navigation key one or more times to highlight the **Paired**: box. Press the **Enter** key to start the edit mode.
  
  b. Press the **Up/Down** navigation keys to open the list. Press the **Up/Down** navigations key to scroll in the **Paired**: list and highlight your headset.
  
  c. Press the **Enter** key to select the headset and close the list. Press the **Enter** key to exit edit mode.
Configuring Local Menu options

10. Choose one of the following:
   • If only one headset is paired, proceed to step 11.
   • If more than one wireless headset is paired, the first headset paired is automatically made the active device. To make a different headset active, do the following.
     — Press the Right navigation key one or more times to highlight the Set button (next to the Set Active Device item).
     — Press the Enter soft key.
     
     The message "Set active: “device name” appears. This means the headset named is now the active headset and is used when you press the headset key.

11. Press the Exit soft key to exit to the main display. Changes are saved automatically.

Dual Pairing Headsets

Take special care when using a "dual pairing" type of Bluetooth wireless technology headset, which can be paired to its base as well as to the 1140E. If it is paired to both, the 1140E is the second device, and the following applies:

Press the headset "telephone" key:
   • If a single tone sounds, the headset is connected to the base.
   • If a double beep sounds, the headset is connected to the 1140E.

If the base is powered off, the headset is only paired to the 1140E and pressing the "telephone" key connects you to the 1140E.
**Note:** Unless you need to dual pair a headset, operating the headset with the 1140E is simpler if the headset is only used with its charging-only base. The desktop IP Phone base should be powered off if it is not in use.

**Interaction with wired headsets**

If you connect a Bluetooth wireless technology headset and a wired headset to the same IP Phone 1140E, the two interact as follows:

- If no wireless headset is paired, the wired headset works as normal. Likewise, if a wireless headset is paired with the set, but is not in range, the wired headset works as normal.
- If the Use BT headset checkbox is selected, the wireless headset is used as the phone headset.

The Bluetooth wireless technology headset can work only if it is within range of the phone; as the wireless headset approaches the edge of its radio range, the audio quality degrades and radio interference noise increases. When the wireless headset is in connecting range, the **Headset** key controls the wireless headset, even if a wired headset is attached. If a wireless headset moves out of connecting range, a special beep sounds in the headset indicating the connection was lost.

**When you do not want to use your Bluetooth technology headset**

If a Bluetooth wireless technology headset is connected, and you want to use the wired headset, you can switch between the two. It is not necessary to unpair or disable the wireless headset.

You can switch between a wired and wireless headset and back again either when the phone is idle or during an active call.

**To switch between a wired headset and a wireless headset:**

1. Double-press the **Headset** key to open the Bluetooth Setup dialog.
To unpair a wireless headset:

1. Double-press the **Headset** key to open the Bluetooth Setup dialog box.

2. Press the **Right** navigation key to select the Paired: item.
3. Choose one of the following:
   • If the name of your headset appears in the Paired box, proceed to step 5.
   • If more than one device is paired, and your headset is not already displayed in the Paired box, do the following:
     a. Press the Right navigation key one or more times to highlight the Paired: box. Press the Enter key to open edit mode.
     b. Press the Up/Down navigation keys to open the list. Press the Up/Down navigations key to scroll in the list and highlight your headset.
     c. Press the Enter key to select the headset and close the box. Press the Enter key to exit edit mode.

4. Press the Right navigation key one or more times to highlight the UnPair button (next to the UnPair Device item).

5. Press the Enter key.

Your Bluetooth wireless technology headset is unpaired and removed from the Paired: item list.

Your Bluetooth wireless technology headset is no longer paired with your phone, and the wired headset can be used. To use the wireless headset again, you must perform the pairing and activation procedure.
Using the 2. Local Diagnostics submenu

The Local Tools menu 2. Local Diagnostics submenu offers the following choices:

- “Using 1. IP Set&DHCP Information” on page 69
- “Using 2. Network Diagnostic Tools” on page 69
- “Using 3. Ethernet Statistics” on page 69
- “Using 4. IP Network Statistics” on page 69
- “Using 5. USB Devices” on page 70

Press the Return soft key at any time while working with tools in the Local Diagnostics submenu to return to the Local Diagnostics submenu. Use the Return key in this way to quickly gather information and run tests without exiting and reentering the Local Tools menu. For example, you can check the Ethernet Statistics, then press Return and enter the Network Diagnostics Tools to ping an IP address.

Using 1. IP Set&DHCP Information

The Network Configuration tool is used to view reports about IP set and DHCP operation. This tool is for administrator use only.

Using 2. Network Diagnostic Tools

The Network Diagnostic Tools menu contains tools that are used to diagnose network problems. This menu is for administrator use only.

Using 3. Ethernet Statistics

The Ethernet Statistics tool is used to view reports about Ethernet operation. This tool is for administrator use only.

Using 4. IP Network Statistics

The IP Networks Statistics tool is used to view reports about network operation. This tool is for administrator use only.
**Using 5. USB Devices**

The USB Devices tool provides information about any Universal Serial Bus (USB) devices that you connect to your phone. Your IP Phone 1140E automatically detects USB devices when you connect them to the USB port in the back of the IP Phone.

To check USB device information, press the **Services** key twice to open the Local Tools menu, press the 2 key on the dialpad to select **2. Local Diagnostics**, and press the 5 key on the dialpad to select **5. USB Devices**.

**To check USB device information:**

The screen displays information about connected devices.

1. Press the **Return** soft key to return to the main display.

**Using the 3. Network Configuration menu**

The Network Configuration tool displays information that was configured when the IP Phone was installed. This tool is for administrator use only.

**Using the 4. Lock Menu**

Your system administrator can use the lock menu tool to protect the Local Tools menu items from accidental or unwanted changes. This tool is for administrator use only.
Making a call

This section describes features associated with making a call. You can make a call from your IP Phone 1140E using any of the following:

- “Using Off-hook dialing” on page 71
- “Using On-hook dialing” on page 72
- “Using handsfree dialing” on page 73
- “Using the Directory applications” on page 75
- “Using Predial” on page 78
- “Using AutoDial” on page 79
- “Using Ring Again” on page 81
- “Using Last Number Redial” on page 82
- “Using Speed Call” on page 82
- “Using System Speed Call” on page 84
- “Using HotLine” on page 84
- “Using intercom calling” on page 84

**Using Off-hook dialing**

Use these steps to make a call by lifting the handset before dialing:

1. Lift the handset.
2. Dial the number.
Making a call

3. To terminate the call, choose one of the following:
   — Return the handset to the cradle.
   — Press the Goodbye key.

Using On-hook dialing

Use these steps to make a call by dialing before lifting the handset:

1. Leave the handset in the cradle.

2. Press the line (DN) key.

3. When the dial tone sounds, dial the number.

4. When the called party answers, lift the handset.

5. To terminate the call, choose one of the following:
   — Replace the handset into the cradle.
   — Press the Goodbye key.
Using handsfree dialing

Use handsfree dialing to use a built-in microphone and speaker, or a headset, instead of the handset. While on an active call, you can switch between handset and handsfree mode.

1. Choose one of the following:
   — Press the Handsfree key.
   — If a headset is connected, press the Headset key.

2. Dial the number.

To discontinue a handsfree call:

Press the Goodbye key.

To mute a handsfree call:

1. Press the Mute key. The LED indicator flashes.

2. Press the Mute key again to return to a two-way handsfree conversation.
Making a call

To switch from handsfree to handset mode:

Lift the handset.

To switch from handset mode to handsfree mode:

1. Press the Handsfree key.
2. Replace the handset.

To use a headset:

1. Connect the headset to the headset jack or the handset jack.
2. Press the Headset key.

If you have a Bluetooth wireless technology headset installed, you can activate it by pressing the button on the headset.

To release a call:

1. Press the phone Goodbye key or press the button on the wireless headset, if equipped.
To switch from handsfree to headset:

1. Press the Headset key.

Using the Directory applications

You can make calls using the following Directory applications available on your IP Phone 1140E.

- “Making a call using the Corporate Directory” on page 75
- “Making a call using the Personal Directory” on page 76
- “Making a call using the Callers List” on page 77
- “Making a call using the Redial List” on page 78

Making a call using the Corporate Directory

This feature is not available on all phones. Contact your system administrator to find out if this feature is available for your use.

The Corporate Directory feature provides an alphabetical list of entries using last names. You can search by name, view additional information on each entry, and dial Corporate Directory numbers. To use the Corporate Directory, press the Directory key and select Corporate Directory.

To search for a specific number:

1. When prompted, use the dialpad to enter the desired name in the last name, first name format.
To scroll to a specific number:

1. Press the Up/Down navigation keys to scroll and highlight a name in the Corporate Directory.

2. Choose one of the following:
   — Press the Dial soft key to dial the resulting number.
   — Press the Cancel soft key to exit without dialing.

Making a call using the Personal Directory

The Personal Directory feature allows you to store a maximum of 100 entries consisting of names and numbers. To use the Personal Directory, press the Directory key and select Personal Directory. For more information on how to configure and use the Personal Directory, refer to “Using the Personal Directory” on page 124.
To make a call using the Personal Directory:

1. Press the Up/Down navigation keys to scroll and highlight a name in the Personal Directory.

2. Choose one of the following:
   - Press the Dial soft key to dial the resulting number.
   - Press the Cancel soft key to exit without dialing.

Making a call using the Callers List

The Callers List feature automatically stores up to a maximum of 100 callers. After 100 callers have been stored, each additional caller overwrites the oldest entry. To use the Callers List, press the Directory key and select Callers List. For information on how to configure and use the Callers List, refer to “Using the Callers List” on page 127.

To make a call using the Callers List:

1. Press the Up/Down navigation keys to scroll and highlight a name in the Callers List.

2. Choose one of the following:
   - Press the Dial soft key to dial the resulting number.
   - Press the Cancel soft key to exit without dialing.
Making a call using the Redial List

The Redial List feature automatically stores a maximum of 20 previously dialed phone numbers. To use the Redial List, press the Directory key and select Redial List. For information on how to configure and use the Redial List, refer to “Using the Redial List” on page 129.

To make a call using the Redial List:

1. Press the Up/Down navigation keys to scroll and highlight a name in the Redial List.

2. Choose one of the following:
   — Press the Dial soft key to dial the resulting number.
   — Press the Cancel soft key to exit without dialing.

Using Predial

Use the Predial feature to enter, preview, and edit numbers before dialing.

To use Predial:

1. Without selecting the line key, enter the number to be dialed.

2. Press a line key to dial the number.
Making a call

To edit a Predial number:

1. Use the dialpad to enter the number.

2. Choose one of the following:
   - To erase all numbers, press the Clear soft key. Re-enter the numbers to be dialed.
   - To change one number at a time, press the Delete soft key to backspace. Re-enter the number.

3. Press a line key to dial the number.

Using AutoDial

Use the AutoDial feature to display, store, and automatically dial phone numbers.

To store an AutoDial number:

1. Without lifting the handset, press the appropriate AutoDial key.
   The screen displays the word Autodial next to the appropriate key.
To display an AutoDial number:

1. Press the **Display** key.

2. Press an **AutoDial** key in the upper display area to display the number associated with that key.

To use AutoDial:

1. Lift the handset.

2. Press an **AutoDial** key in the upper display area to dial the number associated with that key.
Using Ring Again

Use the Ring Again feature if you receive a busy tone, or if there is no answer. Your IP Phone rings when the person you called becomes available. Ring Again automatically redials the number.

To activate Ring Again:

1. Dial a number and receive a busy tone or no answer.

2. Choose one of the following:
   — Press the Ring Again soft key.
   — Enter the Ring Again Activate FFC.

To call a Ring Again party when you receive notification:

1. After receiving the notification ring, lift the handset, or, if you are using the headset or in handsfree mode, go to step 2.

2. Press the Ring Again soft key to automatically dial the number.
To deactivate Ring Again before notification:

Choose one of the following:
- Press the **Ring Again** soft key a second time.
- Press the **Ring Again Deactivate** FFC.

**Using Last Number Redial**

Use the Last Number Redial feature to automatically redial the last dialed number.

**To use Last Number Redial:**

Choose one of the following:

- To redial using the handset:
  a. Lift the handset.
  b. Press the line (DN) key.

- To redial without lifting the handset, press the line (DN) key twice (the last number dialed is automatically redialed).

**Using Speed Call**

Use the Speed Call feature to place internal and external calls by dialing a one-, two-, or three-digit code to store, edit, and automatically dial frequently called phone numbers.
To store a Speed Call number:

1. Press the Speed Call Controller soft key. The triangular icon flashes, indicating programming mode.

2. At the prompt:
   - Enter a one-, two-, or three-digit code (0-999).
   - If required, dial the access code.
   - Enter the phone number (internal, external, or long-distance number).

3. Press the Speed Call Controller soft key again to save the code and number. The flashing icon turns off.

To make a Speed Call:

1. Lift the handset.

2. Press the Speed Call Controller soft key.

3. Dial the Speed Call code to automatically dial the number.
Using System Speed Call

Use the System Speed Call feature to dial Speed Call codes that override dialing restrictions placed on your IP Phone.

To make a System Speed Call:

1. Lift the handset.

2. Choose one of the following:
   - Press the System Speed Call soft key.
   - Press the System Speed Call Controller (SScCtl) soft key.

3. Dial the Speed Call code to automatically dial the number.

Using HotLine

Use the Hot Line feature to automatically dial a specific number.

To use HotLine:

1. Press the HotLine soft key to automatically dial the number.

Using intercom calling

Use the Intercom feature to call a member of your intercom group by pressing the code assigned to each member.
To make an intercom call:

1. Lift the handset.

2. Press the **Intercom** key.

3. Dial the one- or two-digit code for the desired intercom group member.

To answer an intercom call while on a line other than your intercom group line:

1. Choose one of the following keys:
   - Press the **Hold** key to put the current call on hold.
   - Press the **Goodbye** key to end the call.

2. Press the **Intercom** key and begin to speak.
Each incoming call causes the IP Phone to ring, the LCD indicator (R) beside the line (DN) key to flash, and the Message Indicator lamp to flash.

To answer a call:

Choose one of the following four options:

- Lift the handset.
- Press the **Handsfree** button located on the left side of the handset.
- Press the line (DN) key beside the LCD indicator as it flashes.
- Press the **Headset** key if a headset is connected to your IP Phone.
While on an active call

You can use the following features during an active call:

- “Placing a call on hold” on page 87
- “Transferring a call” on page 88
- “Using Timed Reminder Recall” on page 89
- “Using Attendant Recall” on page 90
- “Using Call Park” on page 90
- “Recording a Calling Party Number” on page 93
- “Displaying incoming calls” on page 93
- “Tracing a malicious call” on page 94

Placing a call on hold

Use the Hold feature when you are talking on one line and another call arrives on a second line. To retain the original call, put it on hold and then answer the second call.

To place a call on hold:

Press the Hold key. The LCD indicator flashes beside the line on hold.

Note: If Automatic Hold is enabled, the active call is automatically put on hold when you answer the second call.

To retrieve a call on hold:

Press the line (DN) key beside the flashing LCD indicator.
Transferring a call

Use the Transfer feature to redirect a call to the appropriate person.

To transfer a call to a third party:

1. Press the Transfer soft key. The other party is put on hold and a dial tone sounds. The LCD indicator light flashes steadily.

2. Dial the DN number to which you are transferring the call or use the Personal Directory, Redial List, or Callers List to select a number to dial.

3. When that number rings or a person answers, press the Transfer soft key to connect the calling party.

To return to the original call if the transfer is incomplete:

If the person called is not available, press the line (DN) key (next to the LCD indicator) to reconnect to the original call.
Using Timed Reminder Recall

Use the Timed Reminder Recall feature to receive a reminder tone when a transferred call is not answered.

To use Timed Reminder Recall:

1. Press the **Transfer** soft key. The call is put on hold.

2. Dial the number to which you are transferring the call.

3. Choose one of the following to start the recall timer:
   - Press the **Transfer** soft key.
   - Replace the handset before the extension answers.

   If the transfer is complete, the recall timer stops.

If the transferred call is not answered, your IP Phone rings:

1. Lift the handset to reconnect to the original caller.
While on an active call

Using Attendant Recall

Use the Attendant Recall feature to contact an attendant during a call and to connect the caller to the attendant.

To contact the attendant while on a call:

1. Press the Attendant Recall key and stay on the line until the attendant answers.
2. Press the Goodbye key. The caller remains connected to the attendant.

Using Call Park

Use the Call Park feature to hold temporarily (park) and retrieve a call from any IP Phone. Using Call Park does not tie up a line. When configured network-wide, Call Park can be used across networks. A System Park extension can be configured to automatically park most calls.
To park a call on the System Park DN or your own DN:

During an active call, press the **Park** soft key twice.

The call is parked on your DN unless a [System Park DN](#) is enabled to automatically park calls on the system.

To park a call on a DN other than the System Park DN or your own DN:

1. Press the **Park** soft key.
2. Dial the DN where you want to park the call.
3. Press the **Park** soft key.

To park a call using the SPRE code or FFC:

1. Choose one of the following:
   - Press the **Transfer** soft key.
   - Press the **Conference** soft key.
2. Dial the **Call Park** FFC.
While on an active call

3. To use an alternate DN from the **System Park** DN or your own DN, dial the DN where you want to park the call. Otherwise, proceed to step 4.

4. Choose one of the following:
   — Press the **Transfer** soft key.
   — Press the **Conference** soft key.

To retrieve a parked call:

1. Lift the handset.

2. Press the **Park** soft key.

3. Dial the DN where you parked the call.
   
   If a parked call is not retrieved within a specified period of time, it rings back to your IP Phone or to the attendant.
Recording a Calling Party Number

Use the Calling Party Number feature to record a caller number, or to charge a call to an account number, during an established call.

To record a caller number for accounting purposes:

1. Press the Call Party soft key. The caller is placed on hold.
2. Dial a charge account number or the caller number.
   
   Note: For information on using the Charge soft key, see “Charging a call or charging a forced call” on page 114.
3. Press the Call Party soft key to return to the call.

Displaying incoming calls

Use the Display feature to display a second incoming caller number and name (if available) during an active call, without interfering with the call in progress.

To view the information on an incoming call while on a call in progress:

1. Press the Display key.
While on an active call

2493  

2. Press the flashing line (DN) key. The call waiting information appears.

If you are using another feature key, you can use the Display key to access information associated with those feature keys.

Tracing a malicious call

Use the Call Trace feature to trace nuisance calls within your system.

This feature is not enabled on all IP Phone 1140Es. Contact your system administrator to configure this feature on your IP Phone.

To use Call Trace while on a call:

Press the Call Trace key.

To use Call Trace without a Call Trace key:

1. Choose one of the following:
   — Press the Transfer soft key.
   — Press the Conference soft key.

2. Dial the SPRE code followed by 83 or dial the Call Trace FFC to automatically reconnect.
Incoming calls

You can use the following features when you have an incoming call:

- “Using Automatic Answerback” on page 95
- “Using Call Pickup” on page 95
- “Using Call Waiting” on page 97

Using Automatic Answerback

When the Automatic Answerback feature is active, your IP Phone automatically answers in Handsfree mode after one ring; however, calls are not forwarded to the voice message service.

To activate Automatic Answerback:

Press the Automatic Answerback key.

To deactivate Automatic Answerback:

Press the Automatic Answerback key again.

Using Call Pickup

Use the Call Pickup feature to pick up calls from any IP Phone in your pickup group or another pickup group.

To answer a call in your own call pickup group:

1. Lift the handset.
Incoming calls

2. Choose one of the following:
   — Press the Pickup key.
   — Enter the Pickup Ringing Number FFC.

To answer an incoming call in another call pickup group:

1. Lift the handset.

2. Choose one of the following:
   — Press the Group Pickup soft key.
   — Enter the Pickup Group FFC.

3. Dial the pickup group number of the ringing IP Phone.

To answer a call at a specific extension in any pickup group:

1. Lift the handset.

2. Choose one of the following:
   — Press the DN Pickup key.
   — Enter the Pickup Directory Number FFC.
Using Call Waiting

The Call Waiting feature alerts you to an incoming call by producing a tone. It also puts the current call on hold while you answer the new call.

To answer an incoming call while on another call:

1. When the incoming call tone sounds, press the **Hold** key to put a current call on hold.
   
   If **Automatic Hold** is enabled, you do not need to press the **Hold** key.

2. Press the **Call Waiting** key.

To return to the first IP Phone call:

1. Choose one of the following:
   
   — Press the **Hold** key to put the second call on hold.
   
   — Press the **Goodbye** key to end the second call.
If you do not have a Call Waiting key:

1. Press the **Goodbye** key to end the current call.

2. Press the line (DN) key beside the flashing status icon to answer the incoming call.
While away from your desk

You can use the following features when you are away from your desk:

- “Using Call Forward” on page 99
- “Using Internal Call Forward” on page 100
- “Using Remote Call Forward” on page 101
- “Securing your IP Phone” on page 103

Using Call Forward

Use the Call Forward feature to direct incoming calls to ring on another line (DN). If the IP Phone is in the process of ringing, the call cannot be forwarded.

To forward your calls or change the forward number:

1. Choose one of the following:
   - Press the Forward soft key.
   - Lift the handset and enter the Call Forward All Calls Activate FFC.

2. Dial the DN where you want to forward your calls.

3. Press the Forward soft key.
While away from your desk

To deactivate Call Forward:

Choose one of the following:

- Press the Forward soft key.
- Lift the handset and enter the Call Forward All Calls Deactivate FFC.

To reinstate Call Forward to the same number:

Press the Forward soft key twice.

Using Internal Call Forward

Use Internal Call Forward to accept only calls originating at internal DNs to ring at another DN. Calls originating outside your IP Phone system still ring at your IP Phone. Current incoming calls cannot be forwarded.

To forward internal calls:

1. Choose one of the following:
   - Press the Internal Call Forward key.
   - Lift the handset and enter the Internal Call Forward Activate FFC.

2. Dial the DN to which you are forwarding your internal calls.
While away from your desk

IntForward

3. Press the **Internal Call Forward** key.

To deactivate Internal Call Forward:

Choose one of the following:

- Press the **Internal Call Forward** key.
- Lift the handset and enter the **Internal Call Forward Deactivate FFC**.

To reinstate Call Forward to the same number:

Press the **Internal Call Forward** key twice.

Using Remote Call Forward

Use the Remote Call Forward feature (from any IP Phone other than your own) to forward calls to any IP Phone.

To activate Remote Call Forward:

1. Lift the handset.

2. If you are calling from an IP Phone outside the system, dial your direct system access number and wait for the dial tone.
3. Dial the **Remote Call Forward Activate** FFC to activate the feature.

4. Dial your **Station Control Password**. A dial tone sounds.

5. Choose one of the following:
   - Dial your DN.
   - To forward calls to the previous call forward phone number, press the # key. (Do not perform steps 6 and 7.)

6. Dial the number to which you are forwarding calls. If calls are forwarded to an invalid number, a fast busy signal sounds.

7. Press the # key.

**To deactivate Remote Call Forward:**

1. Lift the handset.

2. If you are calling from an IP Phone outside the system, dial the **direct system access** number and wait for the dial tone.
Securing your IP Phone

Use the Electronic Lock feature to prevent others from making calls from your IP Phone. The Electronic Lock feature is controlled using your Station Control Password (SCPW). To change your Station Control Password, refer to “Security features” on page 21.

To lock your IP Phone:

1. Lift the handset.

2. Dial the Electronic Lock Activate FFC.

3. Dial your Station Control Password.
While away from your desk

4. Choose one of the following:
   — If dialing locally, press the **Goodbye** key.
   — If dialing the FCC remotely, dial your DN.

To unlock your IP Phone:

1. Lift the handset.

2. Dial the **Electronic Lock Deactivate** FFC.

3. Dial your **Station Control Password**.

4. Choose one of the following:
   — If dialing locally, press the **Goodbye** key.
   — If dialing the FCC remotely, dial your DN.
Talking with more than one person

Use the following features to enable conversations between more than two people:

- “Using the Call Join feature” on page 105
- “Setting up a conference call” on page 105
- “Using Conferee Selectable Display” on page 107
- “Using Group Call” on page 108

Using the Call Join feature

Use the Call Join feature to connect a call to a current active call. This connection creates a conference between the two callers and yourself.

To connect a call on hold (on a different line) to your current call:

1. Press the Conference soft key.

2. Press the line key that has the number of the caller you want to connect to your current call.

3. Press the Conference soft key to join the person on hold to your conversation.

Setting up a conference call

Use the Conference feature to set up a conference call for a maximum of three or six people, including yourself. The maximum number of people
the conference feature supports depends on the configuration of your IP Phone.

To set up a conference call:

1. While on a call, press the Conference soft key to place the party on hold. You hear a dial tone.

2. Dial the number of the person you want to add to the conference call. You can talk privately to the person you are adding at this time.

   Note: Instead of dialing a number, you can press the Directory key, and use the Corporate Directory or Personal Directory, Redial List, and Callers List to find and dial the number of the person you want to add to the conference call.

3. Press the Conference soft key a second time to conference all parties together.

If the person you attempt to add to the conference is unavailable:

1. Press the Goodbye key.

2. Press the line (DN) key beside the flashing status icon to return to your original call.
Using Conferee Selectable Display

Use the Conferee Selectable Display feature to list active conferees and disconnect a conferee from the conference call.

To view active conferees:

1. While on a conference call, press the Conferee Selectable Display key to turn on the LCD indicator. Each key press changes the screen to show a different active conferee.

   This action has no effect on the display of other IP Phones involved in the conference.

2. Press the Goodbye key. If configured, the Conference Count Display returns an updated total count of conferees. The LCD indicator turns off.

To disconnect a conferee:

1. While on a conference call, press the Conferee Selectable Display key until the conferee you want to disconnect appears on the screen.

2. Press the DN key on which the conference call is established.
Talking with more than one person

3. Choose one of the following:
   - For a single conferee, press the Goodbye key. If configured, the Conference Count Display returns an updated total count of conferees. The LCD indicator turns off.
   - For multiple conferees, repeat steps 1 and 2 until all conferees are disconnected. Then press the Goodbye key.

Using Group Call

Use the Group Call feature to automatically call members of a predefined group, one at a time, until all members answer.

To call group members:

1. Lift the handset.

2. Press the Group Call key or enter the Group Call FFC.
   - The feature automatically calls all group members. The icon flashes until all members answer.
   - The phone numbers of the group members appear on the display as they answer. When the last person answers, the Group Call indicator lights steadily.
— When a person in your group is on a conference call or another group call, they are not connected to your group call.

— After everyone in the group has answered, only the person who made the group call can put the call on hold.

**To answer a group call:**

1. Lift the handset. Note the following about notification tones:
   — If you are on a call and receive three 10-second tones, this is the notification of a group call on your current extension.
   — If you are on a call on another line when a group call is made, you receive a long tone through the handset or speaker.
   — If you are already on a conference call or another group call, you do not receive notification of a group call.

**To end a group call:**

Press the **Goodbye** key.

*Note:* When the person who made the group call disconnects, the call terminates for all members of the group. However, the members of the group call can disconnect from the call and not affect other members on the call.
Working without interruption

This section describes features that provide uninterrupted work time.

**Using Make Set Busy**

Use the Make Set Busy feature to make your IP Phone appear busy to all callers.

**To activate Make Set Busy:**

Choose one of the following:

- Press the **Make Set Busy** key.
- Lift the handset and enter the **Make Set Busy Activate** FFC.

**To deactivate Make Set Busy:**

Choose one of the following:

- Press the **Make Set Busy** key a second time to deactivate the feature.
- Lift the handset and enter the **Make Set Busy Deactivate** FFC.
Additional call features

Contact your system administrator to determine if the following call features are available on your IP Phone.

- “Using AutoDial Transfer” on page 111
- “Using the Buzz signal” on page 112
- “Using Call Page Connect to make an announcement” on page 112
- “Using Centrex/Exchange Line Switchhook Flash” on page 113
- “Charging a call or charging a forced call” on page 114
- “Using Enhanced Override” on page 117
- “Using Forced Camp-on feature” on page 118
- “Overriding a busy signal” on page 119
- “Using Privacy Release” on page 119
- “Using Radio Page” on page 120
- “Using Voice Call” on page 122

Using AutoDial Transfer

Use the AutoDial Transfer feature to transmit digits through your AutoDial key to the Central Office after a Trunk Switchhook Flash. You must be on a Central Office/Exchange (CO) trunk call from or to a CO that offers Centrex or exchange line-type features.

To use AutoDial Transfer when picking up an incoming trunk call:

1. Press the Centrex Switchhook Line Flash key and wait for an interrupted dial tone.
2. Press the AutoDial key to call the number desired.
Using the Buzz signal

Use the Buzz feature to notify another person of a call, a visitor, or a request. Two IP Phones that are linked together enable one person to signal the other. The person signaled hears a buzz.

To buzz the IP Phone linked to your IP Phone:

1. Lift the handset.
2. Press the Buzz key. The IP Phone linked to your IP Phone buzzes as long as you press the key.

Using Call Page Connect to make an announcement

Use the Call Page Connect feature to make an announcement over a paging system.

*Note:* A Page key on an attendant console overrides and disconnects the IP Phones. The IP Phones must reaccess the page trunk.

To connect to Call Page:

1. Lift the handset.
Using Centrex/Exchange Line Switchhook Flash

Use the Centrex/Exchange Line Switchhook Flash feature during an established call to use a Centrex service, such as Call Transfer or Three-Way Calling.

To use Centrex/Exchange Line Switchhook Flash:

1. While on a call, press the Centrex Line Switchhook Flash key. A special dial tone sounds.

2. Dial the codes for your custom Centrex feature.

3. Press the Goodbye key to end the call.
Charging a call or charging a forced call

Use the Call Charge feature to charge a call to a specific account. The Forced Charge feature charges long-distance calls from an IP Phone restricted to local calls.

To charge a local or long-distance call to an account before you dial:

1. Lift the handset.

2. Choose one of the following:
   — Press the **Charge** soft key.
   — Dial the **Call Detail Recording** FFC.

3. Dial the charge account number.

4. When the dial tone sounds, dial the number.

To charge a call in progress:

1. Choose one of the following:
   — Press the **Transfer** soft key.
   — Press the **Conference** soft key.
2. Choose one of the following:
   — Press the **Charge** soft key.
   — Dial the **Call Detail Recording** FFC.

3. Dial the charge account number.

4. Press the line (DN) key to return to the call.

### To charge a call to an account when you transfer a call:

1. Press the **Transfer** soft key. The call is placed on hold.

2. Choose one of the following:
   — Press the **Charge** soft key.
   — Dial the **Call Detail Recording** FFC.

3. Dial the charge account number.

4. After the dial tone, dial the number to which you are transferring the call.
5. Press the **Transfer** soft key when you hear the IP Phone ring.

You can talk privately to the person at the transfer number before you press the **Transfer** soft key.

**To charge a call to an account when you add someone to a conference call:**

1. Press the **Conference** soft key. The call is placed on hold.

2. Choose one of the following:
   — Press the **Charge** soft key.
   — Dial the **Call Detail Recording** FFC.

3. Dial the charge account number.

4. Dial the number of the person you want to add to the conference.

5. Press the **Conference** soft key.
Using Enhanced Override

Use the Enhanced Override feature to override an active call after you attempt a Forced Camp-on. Use Enhanced Override to make a call or a consultation call, such as placing a call on hold and calling another party.

To use Enhanced Override:

You receive a busy signal after dialing a phone number.

1. Choose one of the following:
   — Press the **Override** key.
   — Enter the **Override** FFC to initiate a Forced Camp-on.

   If either person on the call disconnects at this time, you receive an overflow (fast busy or engaged) signal.

2. Choose one of the following:
   — Press the **Override** key again.
   — Enter the **Override** FFC again.

   The other two people on the call receive an override tone and a conference call is established between the three of you. If anyone disconnects, the other two people remain connected.

3. To terminate the call, press the **Goodbye** key.
Using Forced Camp-on feature

Use the Forced Camp-on feature to automatically ring another IP Phone (internal or external) immediately after that IP Phone disconnects from its current call.

To use Forced Camp-on:

1. Choose one of the following:
   - Press the Override key.
   - Enter the Override FFC to initiate a Forced Camp-on.

   The person you called receives a tone. You receive a ring signal or a busy signal, depending on the options chosen. You are now camped-on to the number you dialed.

2. Return the handset to the cradle.

3. When the person you called finishes the call, your IP Phone automatically dials the number and both IP Phones ring.

Answering a call camped-on to your extension:

When your IP Phone rings, lift the handset.

You can program your IP Phone for either Camp-on or Call Waiting, but not both.
Overriding a busy signal

Use the Override feature to override a busy signal and interrupt another call.

To override a busy signal:

1. You receive a busy signal after dialing a phone number.

2. Choose one of the following:
   - Press the **Override** key.
   - Enter the **Override** FFC. The people in the targeted call receive a tone for approximately 1 second. After the Override feature joins you to the call, a short tone repeats every 16 seconds.

3. To terminate the call, press the **Goodbye** key.

Using Privacy Release

Use the Privacy Release feature to enable one or more people who share your DN to join a call.
To use Privacy Release in an established state:

Press the Privacy Release soft key during a call. People can join the call by pressing the shared number (DN) key on their IP Phone (Multiple Appearance DN feature).

Using Radio Page

Use the Radio Page feature to page a person and stay on the line until they answer. The paged person answers the call after entering a special Page Meet-me code from any IP Phone.

To use Automatic Preselection (Meet-me page):

1. Lift the handset.

2. Dial the Radio Paging Access FFC. The paging tone sounds (two beeps followed by a dial tone).

3. Dial the number of the party you want to page. After dialing, the ringback tone sounds. The paged person can use any IP Phone to enter a Radio Paging Answer FFC, plus their own DN number.
To use Automatic Post-selection:

The called party is either busy on the IP Phone or away from their desk. To page the called party, you do not need to redial the number of the called party.

2. Dial the Radio Paging Access FFC. The ringback tone sounds. The paged person can use any IP Phone to enter a Radio Paging Answer FFC, plus their own DN number.

3. If your call goes unanswered for a preset time period and a 15-second high-pitched tone sounds, followed by silence, press the Goodbye key or replace the handset.

4. If your call goes unanswered for a preset time period and a 15-second high-pitched tone sounds followed by silence, press the Goodbye key or replace the handset.
**Additional call features**

**To answer a Radio Page:**
If you carry a Radio Pager, a page indicates that someone dialed your DN. If the Radio Page system is configured to function in Meet-me mode, you can answer the page call from any IP Phone.

1. Lift the handset.

2. Dial the **Radio Page Answer** FFC. The paging tone sounds.

3. Dial your own DN to connect to the paging caller. If the caller has disconnected, a steady high-pitched (number unavailable) tone sounds.

**Using Voice Call**

Use the Voice Call feature to make an announcement through someone else’s IP Phone speaker.

**To make a voice call:**

1. Lift the handset.

2. Press the **Voice Call** key and make the announcement.

3. Press the **Goodbye** key.
To respond to a voice call:

Your IP Phone rings once and the caller's voice transmits through your speaker. Lift the handset.
Additional phone features

The following features are described in this section:

- “Using the Personal Directory” on page 124
- “Using the Callers List” on page 127
- “Using the Redial List” on page 129
- “Using Virtual Office” on page 131
- “Using Media Gateway 1000B” on page 140

Using the Personal Directory

Use the Personal Directory feature to create and store up to 100 directory entries. A Personal Directory entry can contain:

- last name (up to 24 characters)
- first name (up to 24 characters)
- phone numbers (up to 31 characters)

To use the Personal Directory, press the Directory key and select Personal Directory.

To add an entry:

1. Press the Add soft key.
   If the message Directory is full appears, delete one or more entries to add a new entry.

2. Use the dialpad to enter the name.
To edit an entry:

1. Press the **Up/Down** navigation keys to scroll and highlight the desired entry.

2. Press the **Edit** soft key and perform your edits.

3. Choose one of the following:
   - Press the **Done** soft key to save the changes.
   - Press the **Cancel** soft key to return to the Personal Directory without saving your changes.
Additional phone features

To delete an entry:

1. Press the Up/Down navigation keys to scroll and highlight the desired entry.

2. Press the Delete soft key.

3. Choose one of the following:
   — Press the Confirm soft key to delete the entry.
   — Press the Cancel soft key to return to the Personal Directory without deleting the entry.

To search for an entry:

1. Press the Up/Down navigation keys to scroll and highlight the desired entry.

2. Choose one of the following:
   — Press the Dial soft key to dial the resulting number.
   — Press the Cancel soft key to exit without dialing.
Using the Callers List

The Callers List feature logs all incoming calls. The Callers List can store up to 100 entries. When the list is full, the system overwrites the oldest entry. Use the Callers List feature to review missed calls and to dial calls. The Callers List contains:

- the caller’s last and first name (if available)
- the DN of the caller
- the time and date of the call
- the number of times the caller called

Entries in the Callers List are sorted by the time the call arrived.

The appearance of names in the Callers List depends on the configuration of Preferred Name Match. If Preferred Name Match is activated on your phone, the Calling Party Name Display (CPND) appears according to the configuration settings on your phone. If Preferred Name Match is off, the CPND appears according to the system configuration.

To access the Callers List, press the Directory key and select Callers List. If password control is enabled, you must enter your SCPW at the prompt.
To dial an entry:

1. Press the Up/Down navigation keys to scroll and highlight the desired entry.
2. Press the Dial soft key.

To delete an entry:

1. Press the Up/Down navigation keys to scroll and highlight the desired entry.
2. Press the Delete soft key.
3. Choose one of the following:
   - Press the Confirm soft key to delete the entry.
   - Press the Cancel soft key to return to the Personal Directory without deleting the entry.
To delete the entire Callers List:

1. Press the **Delete** soft key.

2. Choose one of the following soft keys:
   - **Yes** to delete the entire Callers List
   - **No** to return to the previous screen

**Using the Redial List**

The Redial List feature logs all outgoing calls. Redial List can stored up to 20 entries. When the list is full, the system overwrites the oldest entry. Use the Redial List feature to review calls made, and to redial previously dialed calls. The Redial List contains:

- the last and first names of the dialed party (if available)
- the DN of the dialed party
- the time and date of the last dialed occurrence

Entries in the Redial List are sorted by the time the call was received.

The appearance of names in the Redial List depends on the configuration of Preferred Name Match. If Preferred Name Match is activated on your phone, the Calling Party Name Display (CPND) appears according to the configuration settings on your phone. If Preferred Name Match is off, the CPND appears according to the system configuration.

To access Redial List, press the **Directory** key and select **Redial List**. If password control is enabled, you must enter your SCPW at the prompt.
Additional phone features

To dial an entry:

1. Press the **Up/Down** navigation keys to scroll and highlight the desired entry.

2. Press the **Dial** soft key.

To delete an entry:

1. Press the **Up/Down** navigation keys to scroll and highlight the desired entry.

2. Press the **Delete** soft key.

3. Choose one of the following soft keys:
   - **Yes** to delete the entry
   - **No** to return to the previous screen

To delete the entire Redial List:

1. Press the **Delete** soft key.

2. Choose one of the following soft keys:
   - **Yes** to delete the entire Redial List
   - **No** to return to the previous screen
Using Virtual Office

The Virtual Office feature provides a service you can use while you are away from your desk to transfer calls, and all your office IP Phone features, to a remote IP Phone. Virtual Office makes this possible by allowing you to use another IP Phone (the Remote phone) to log in to your own home or office IP Phone (the Office phone). After you log in, you can access the DNs, autodial numbers, key layout, feature keys, and voicemail features that are configured on your own home or office IP Phone.

To use Virtual Office, you need your DN and preconfigured Station Control Password (SCPW). You must activate Virtual Office on your Office phone before you can connect to it from a Remote phone. See “Logging in to Virtual Office” on page 132.

Consult your system administrator to verify if the Virtual Office feature is available for your use.

You can use an IP Phone as a Remote phone to connect to your IP Phone 1140E even if it is a different IP Phone model. Table 7 shows the IP Phones on which you can use Virtual Office to connect to your IP Phone 1140E.

Table 7: Virtual Office connection availability

<table>
<thead>
<tr>
<th>Using IP Phone</th>
<th>Possible to log in to the 1140E?</th>
</tr>
</thead>
<tbody>
<tr>
<td>IP Phone 1120E</td>

<td>Yes</td>
</tr>
<tr>
<td>IP SoftPhone 2050</td>
<td>Yes, with restrictions</td>
</tr>
<tr>
<td>IP Phone 2007</td>
<td>Yes</td>
</tr>
</tbody>
</table>

Note: A Virtual Office login from an IP Phone 1140E to an IP Phone 1120E or IP Softphone 2050 is blocked in certain situations. Consult your system administrator.

Logging in to Virtual Office

To activate Virtual Office on your Office IP Phone from your Remote IP Phone:

1. Press the Services key.
2. Press the Up/Down navigation keys to scroll and highlight Virtual Office Login.
3. Press the Enter key.
4. At the prompt, enter your user ID.
5. Press the Enter key.
6. At the prompt, enter the home **Station Control Password (SCPW)**.

If the user ID is not found locally, the message *Locating Remote Server* appears.

After three failed login attempts, wait 1 hour before attempting to log in again, or contact your system administrator to reset your password. For more information, see “Security features” on page 21.

A successful login transfers all the features, time, date, and tones to your Remote IP Phone from your Office IP Phone. Your Virtual Office session expires after a fixed period of time, (determined by your system administrator).

**Using Virtual Office on your Remote IP Phone**

Because the display characteristics, including size, vary from one IP Phone model to the next, your Office IP Phone 1140E display is different on each Remote phone. Figure 9 shows an IP Phone 1140E logged in as a Remote phone to an IP Phone 1140E Office phone. All the features appear as they do on your Office IP Phone 1140E.
Additional phone features

Figure 9: Logged in to an IP Phone 1140E

Figure 10 shows an IP Phone 1120E logged in as a Remote phone to an IP Phone 1140E Office phone. Fewer display lines are available on the 1120E, so the display provides less information.

Figure 10: Logged in to an IP Phone 1140E using an IP Phone 1120E
Figure 11 shows an IP Softphone 2050 logged in as a Remote phone to an IP Phone 1140E Office phone. In this case, the information display is arranged in a different fashion, but all the information is visible at one time.

**Figure 11: Logged in to an IP Phone 1140E using an IP Softphone 2050**

Regardless of what model of IP Phone you use as a Remote phone, a User information line appears, which lists the number of your Office IP Phone.

**Using Virtual Office on your Office IP Phone**

Figure 12 shows the IP Phone 1140E display when the phone is logged out due to remote access.
When activated for Virtual Office by a Remote IP Phone, your Office IP Phone is *logged out* and no longer operational. If this is the case when you return to your office, you can disconnect the remote login and regain control of your Office phone. If you do not disconnect the remote login, your Virtual Office session expires after a fixed period of time, determined by your system administrator.
To regain operation of a IP Phone being used for Virtual Office:

Choose one of the following:

— To completely disconnect your Office IP Phone from the Remote IP Phone:
  a. Press the Home key.
  b. Enter your User ID and password (this logs the Office IP Phone back on to your office network).

— Press the Virtual soft key to log in to another IP Phone, and your IP Phone becomes a Remote IP Phone.

Logging out of Virtual Office

While working on a Remote phone, you can log out of Virtual Office using the following steps.

To log out from a Remote IP Phone:

1. Press the Services key.

(Services)

2. Press the Up/Down navigation keys to scroll and highlight Virtual Office Logout.

3. Press the Enter key.
## Troubleshooting Virtual Office

Virtual Office can cause error messages to display on-screen. Table 8 lists error messages and describes actions to correct the causes.

### Table 8: Troubleshooting Virtual Office (Part 1 of 3)

</tbody>
</table>
The Media Gateway 1000B (MG 1000B) provides a means of extending CS 1000 Release 4.5 features to one or more remotely located branch offices using the Branch Office feature. A branch office is a remote location in the network where IP Phones, PSTN access, and TDM IP Phones are located. Contact your system administrator to see if these functions are available for your use.

The Media Gateway 1000B (MG 1000B) IP Phone can operate in Normal or Local Mode.

**Normal Mode**

The IP Phone registers with the Main Office and receives IP Phone services from the Main Office. At any time while using Normal Mode, you can check Local Mode functionality (make and receive calls) by enabling Local Mode and returning to Normal Mode. After testing, you can return to Normal Mode (see “Using Resume Normal Mode” on page 141) or wait for 10 minutes.

**Local Mode**

If the WAN connection goes down, the IP Phone loses communication with the Main Office TPS. It then registers with the MG 1000B and receives IP Phone services from the MG 1000B. Features such as Personal Directory, Redial List, and Callers List are not available when operating in Local Mode. When in Local Mode, the IP Phone displays the message **LOCAL MODE**.

### Table 8: Troubleshooting Virtual Office (Part 3 of 3)

</tr>
</tbody>
</table>
**Using Test Local Mode**

Use Test Local Mode to check Local Mode functionality (make and receive IP Phone calls). Test Local Mode is useful when provisioning has changed for an IP Phone on an MG 1000B Controller.

1. Press the **Services** key.

2. Press the **Up/Down** navigation keys to scroll and highlight Test Local Mode.

3. Press the **Enter** key (the IP Phone resets and registers back to the branch office).

**Using Resume Normal Mode**

Use the Resume Normal Mode command to return to Normal Mode after testing survival functionality. If you do not use the Resume Normal Mode command after testing, the IP Phone automatically returns to Normal Mode in 10 minutes.

1. Press the **Services** key.

2. Press the **Up/Down** navigation keys to scroll and highlight **Resume Normal Mode**.

3. Press the **Enter** key (the IP Phone registers back to the main office).
Troubleshooting MG 1000B

The MG 1000B can cause error messages to display on-screen. Table 9 lists error messages and describes actions to correct the causes.

</table>
Using Hospitality features

Hospitality features are intended for hotel operations.

Configuring Automatic Wake-Up

Use the Automatic Wake-Up feature to receive a timed reminder call. From your IP Phone, you can program the system to automatically place a call to you at a predetermined time. When you answer the call, recorded music plays for up to 30 seconds, followed by a prerecorded announcement or the attendant.

To enter the time for an Automatic Wake-Up call:

1. Lift the handset.
2. Dial the Automatic Wake-Up Request FFC.
3. Dial the Automatic Wake-Up time in a 24-hour time format (hhmm). A tone sounds to confirm your entered time.

To enter the time in a 24-hour time format, enter the hours followed by the minutes. For example, to set the time to 7:30 a.m., enter 0730; to set it to 9:45 p.m., enter 2145.

4. Press the Goodbye key.
Using Hospitality features

To cancel an Automatic Wake-Up call:

1. Lift the handset.

2. Dial the **Automatic Wake-Up Quit** FFC.

3. Press the **Goodbye** key.

To verify the time for the Automatic Wake-Up call:

1. Lift the handset.

2. Dial the **Automatic Wake-Up Verify** FFC.

3. Dial the **Automatic Wake-Up** time in a 24-hour time format (hhmm). If your query matches the preset time, a confirmation tone sounds.

   To enter the time in a 24-hour time format, enter the hours followed by the minutes. For example, to set the time to 7:30 a.m., enter 0730; to set it to 9:45 p.m., enter 2145.

4. Press the **Goodbye** key.
Activating Message Registration

Use the Message Registration feature to read, change, or reset meters that log your hotel phone calls.

To read meters:

1. Press the Message Registration key.
2. Dial the room Directory Number (DN).
3. Press the Message Registration key.

To change a meter:

1. Press the Message Registration key.
2. Dial the room Directory Number (DN).
3. Dial the correct meter count.
4. Press the * key.
5. Press the Message Registration key.
To reset a meter to zero:

1. Press the **Message Registration** key.

2. Dial the room Directory Number (DN).

3. Press the * key.

4. Press the **Message Registration** key.

**Using Maid Identification**

Use the Maid Identification feature to track the cleaning status of rooms. The maid enters the information from the IP Phone in each room.

**To enter cleaning status:**

1. Press the **Room Status** key.

2. Dial the **Directory Number** (DN) for the room.
Using Hospitality features

3. Dial one of the following cleaning status codes:
   1 = Cleaning requested
   2 = Cleaning in progress
   3 = Room cleaned
   4 = Room passed inspection
   5 = Room failed inspection
   6 = Cleaning skipped

   The interrupted dial tone sounds.

4. Press the * key.

5. Dial the Maid ID. If you dial the wrong Maid ID, press the * key and redial the ID.

6. Press the Room Status key.

Displaying Room Status

Use the Room Status feature to display the status of a room using the Display Module.

To display the status of a room:

1. Press the Room Status key.
Using Hospitality features

2. Dial the **Directory Number** (DN) for the room. The DN appears followed by a two-digit code.

   The first digit indicates the occupancy status:
   
   0 = Room vacant
   1 = Room occupied

   The second digit indicates the cleaning status of the room:
   
   1 = Cleaning requested
   2 = Cleaning in progress
   3 = Room cleaned
   4 = Room passed inspection
   5 = Room failed inspection
   6 = Cleaning skipped

3. Press the **Room Status** key.

Changing the status of a room:

1. Press the **Room Status** key.
2. Dial the **Directory Number** (DN) for the room. The DN appears followed by a two-digit code.

   The first digit indicates the occupancy status:
   
   0 = Room vacant
   1 = Room occupied

   The second digit indicates the cleaning status of the room:
   
   1 = Cleaning requested
   2 = Cleaning in progress
   3 = Room cleaned
   4 = Room passed inspection
   5 = Room failed inspection
   6 = Cleaning skipped

3. Dial the status code for the room. A three-digit code appears. The first digit indicates the occupancy status, the second is the previous cleaning status, and the third is the new status.

4. Press the **Room Status** key.
Accessing External Server Applications

Use External Server Applications to access a variety of applications directly from your IP Phone 1140E.

To find out what features and services are available, contact your system administrator. Depending on what is available on your system, your phone can provide information; for example, local news and weather, stock market information, or traffic reports.

For more information about the External Server Applications, consult the Nortel IP Phone External Server Applications User Guide.
Flexible Feature Codes (FFCs)

Use Table 10 to track the FFCs assigned by your system administrator.

Flexible Feature Codes (FFCs)
Regulatory and safety information

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

• Reorient or relocate the receiving antenna.
• Increase the separation between the equipment and receiver.
• Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
• Consult the dealer or an experienced radio/TV technician for help.

Note: The user should not make changes or modifications not expressly approved by Nortel Networks. Any such changes could void the user’s authority to operate the equipment.

This Class B digital apparatus complies with Canadian ICES-003. Cet appareil numérique de la classe B est conforme à la norme NMB-003 du Canada.

Warnings:

• This is a Class B product. In a domestic environment this product can cause radio interference in which case the user must take adequate measures.
• Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device.
• Privacy of communications may not be ensured when using this IP Phone.
• This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with a minimum distance of 20cm between the radiator and your body (excluding the handset). This transmitter must not be colocated or operated in conjunction with any other antenna or transmitter.

To prevent radio interference to the licensed service, this device must be operated indoors only and should be kept away from windows to provide maximum shielding.

この装置は、情報処理装置等電波障害自主規制協議会（VCCI）の基準に基づくクラスB 情報技術装置です。この装置は、家庭環境で使用することを目的としていますが、この装置がラジオやテレビジョン受信機に近接して使用されると、受信障害を引き起こすことがあります。

取扱説明書に従って正しい取り扱いをして下さい。

**Other**

**US/Canada:** Hearing Aid Compatibility (HAC) as per FCC Part 68

This equipment complies with the CE Marking requirements.

**EU Countries:** This device complies with the essential requirements and other relevant provisions of Directive 1999/5/EC. A copy of the Declaration may be obtained from [www.nortel.com](http://www.nortel.com) or Nortel Networks GmbH address: Ingolstaedter Strasse 14-18, 80807 Munich Germany

**Australia: AS/ACIF S004:** Voice Frequency Performance Requirements for Customer Equipment

**Bluetooth wireless technology:** This portable device with its antenna complies with FCCs RF radiation exposure limits for an uncontrolled environment. To maintain compliance, this transmitter must not be colocated or operate in conjunction with any other antenna or transmitter.
DenAn regulatory notice for Japan

⚠️ Warning

Please be careful of the following while installing the equipment:

- Please only use the Connecting cables, power cord, AC adaptors shipped with the equipment or specified by Nortel to be used with the equipment. If you use any other equipment, it may cause “failures, malfunctioning or fire”.
- Power cords shipped with this equipment must not be used with any other equipment. In case the above guidelines are not followed, it may lead to death or severe injury.

⚠️ 警告

本製品を安全にご使用頂くため、以下のことにご注意ください。

- 接続ケーブル、電源コード、ACアダプタなどの部品は、必ず製品に同梱されております添付品または指定品をご使用ください。添付品・指定品以外の部品をご使用になると故障や動作不良、火災の原因となることがあります。
- 同梱されております付属の電源コードを他の機器には使用しないでください。
  上記注意事項を守らないと、死亡や大怪我など人身事故の原因となることがあります。
Terms you should know

Calling Party Name Display

Information appearing on the LCD display screen, such as the caller’s name and phone number. The system must have CPND enabled.

Category 5 (Cat5)

Cable and associated connecting hardware capable of transmitting at speeds up to 100 MHz, used by 10BaseT, 100BaseT4, 100BaseTX.

Category 5e (Cat5e)

Most Cat5 cable manufactured after 1996 also supports 1000BaseT (GigE) installations, and is designated Cat 5e. Cat5e cable normally has four pairs of copper wire.

Category 6 (Cat6)

Cable and associated connecting hardware capable of transmitting at speeds up to 200 MHz. Designed specifically to support 1000BaseT (GigE), it is also compatible with 10BaseT, 100BaseT4, and 100BaseTX installations. The cable normally has four pairs of copper wire.

Communication Server 1000

Your office communication system.

Context-sensitive soft keys

A set of keys programmed by your system administrator. These four keys, located directly below the display area, have four programmable layers. These keys are also used to configure parameters in the Telephone Options menu.

Date/time display

The current date and time when the IP Phone is in an idle state.
Terms you should know

**Directory Number (DN)**
A number consisting of one to seven digits for an IP Phone, and also known as an *extension number*.

**Feature display**
An area that shows status information about the feature in use. It also displays the name and status of the active session.

**Feature Status Lamp indicator**
An LCD or an LED that indicates a data message, contact, or feature status by a flash, wink, steady on, or off.

**Fixed key**
The hard-labeled keys on your IP Phone.

**Flexible Feature Codes (FFCs)**
Specialized codes entered using the dialpad that enable features (for example, Ring Again).

**Goodbye key**
A fixed key used to end an active call.

**Indicator**
An LCD or an LED that indicates the status of a feature by the flash, wink, steady on, or off.

**Information display**
Any display of call activity, lists, prompts, and status of calls. If the text message exceeds the available display area, a scroll arrow icon indicates that you must use the scroll keys to view the remaining text.

**Interrupted dial tone**
A broken or pulsed dial tone that sounds when you access some features on your IP Phone.
Message/Inbox

A fixed key on your IP Phone 1140E that connects to your voice messaging system when the key is pressed.

Navigation keys

Keys used to scroll through menus and lists appearing on the LCD display screen.

Off-hook

Any line selected to make a call or receive an incoming call. The term off-hook is applied whether (a) the end user lifts up the handset, (b) the end user presses a line key, (c) the call is automatically answered at the IP Phone, or (d) a line is automatically selected for an outgoing call.

Paging tone

A special tone (two beeps followed by dial tone) that sounds when you use the Radio Paging feature.

Ringback/ring tone

A sound indicating that a call you have made is ringing at its destination.

Services key

A fixed key used to access options such as Telephone Options, Password Admin, Virtual Office Login, Virtual Office Logout, Test Local Mode, and Resume Normal Mode.

Shared Directory Number

A DN (extension) that is shared by two or more persons.

Special Prefix code (SPRE)

Special codes entered using the dialpad, followed by a two-digit access code, that enable features (for example, Call Forward All Calls requires entry of SPRE code + 74).
Terms you should know

Special dial tone
The three consecutive tones followed by dial tone that you hear when accessing IP Phone features.

Station Control Password (SCPW)
Enables security features on your phone to prevent others from making calls from your IP Phone and to prevent access to protected features (for example, Remote Call Forward).

Status Messages
A message displayed to inform the user of important information. A right arrow appears if more than one Status Message is present. Examples of Status Messages include: Message Waiting, All Lines Forwarded to: 6453, Do Not Disturb On, Ring Again active, and Ringer is OFF.

System or Switch
Your office communication system.

Switchhook
A button on which the handset presses down, disconnecting your call when you replace the handset. The handset (when lifted) releases the switchhook, and you either answer an incoming call or you receive a dial tone to make a call.

User interface
Screen displays that interact with the end user as a result of an action or event.

Visual Alerter/Message Waiting indicator
An LCD or an LED that flashes to indicate that a message is waiting or when the ringer is on.
