

Cant Sign in after Changing my UB password:

Like other Microsoft 365 Services, you may initially lose access to Teams until you re-enter your password. Teams may prompt you on the top of the Teams application window to sign-in, where you can click the banner and re-enter your netID and password when prompted. If you are unable to reenter your password or if you are not prompted to, then right-click on the Teams icon on the taskbar on the bottom-right (Windows) and click sign-out. You will then be able to sign back in with your email as normal.
