

- **How do I join or start a Team?**

Start by going to the **Teams**  icon in your app. In the upper right or lower left, depending on your app, there's a **Join or Create a Team** button.

This displays:

- A **Create a team** option
- A **Join a team with a code** option, this is for private teams
- Any public UB teams available to join
- A search bar to search for teams (this is useful if there are a lot of public teams available)

To **join a private team**:

You will need either a code or have been invited by a member. When invited, you'll receive a link to click in email. The owner will need to approve your request before you can access the team.
