

## Upcoming Changes to the UBalt Single Sign-On Experience

Changes are coming to your single sign-on log-in experience for University of Baltimore (UBalt) systems. These changes will be released on the evening of Friday, June 7th.

### Log-in Screen and Credential Formatting Change

A new log-in screen will be used to log in to UBalt systems. The new UBalt log-in process will use Microsoft authentication, but your password will stay the same.

For most UBalt systems, the grey log-in screen will be replaced with a UBalt-branded screen. The screen will feature a background photo and a right-justified sign in box with the University of Baltimore logo. If the background photo cannot load, the background will default to blue.

When logging in, your username must be formatted as **[NETID]@ubalt.edu**. A user's email address or NETID alone will not be accepted.

Example:

Old Log-in ID: **ID12AB34**

New Log-in ID: **ID12AB34@ubalt.edu**

The systems that will continue to use the grey log in screen include:

- Virtual Event Management System (VEMS)
- ePrint

- Daily Digest Administration
- Replacement Card
- Roommate Connector
- Online Writing Lab
- Early Alert
- Directory Administration
- Peoplesoft DEV/Test/QA

Over the coming months, these systems will be updated to use the new log-in screen above. All other systems utilizing single sign-on will use the new log-in screen pictured above.

If you have any questions or concerns about this, don't hesitate to get in touch with the Office of Technology Service (OTS) Call Center.

Thank You.
