

ACADEMIC ADVISING, REGISTRATION AND ACADEMIC POLICIES

ACADEMIC ADVISING

College of Public Affairs: 410.837.5359
Merrick School of Business: 410.837.4944
Yale Gordon College of Arts and Sciences: 410.837.5351

The University is committed to academic excellence and student success. A professional staff of academic advisers is available in the College of Public Affairs, the Merrick School of Business, and the Yale Gordon College of Arts and Sciences. Students should meet with an adviser before each registration period to ensure that they are making proper academic decisions and progressing toward their degree. For some students, an adviser's signature is required for registration. It is important that students become familiar with their adviser and take advantage of these experts' in-depth knowledge of the various academic programs and policies.

Students should make an appointment to see an adviser before withdrawing from the University, even if they expect the withdrawal to be temporary.

Incoming students should take writing or math placement examinations before registering for their first semester at the University. Students admitted as first-year students must take placement tests prior to their first registration. Transfer students are required to take such placements tests prior to registration for their second semester at UBalt (unless they are transferring with under 24 credits and are admitted as freshmen). Placement test scores help the adviser do a better job of planning a program of study with the student. Early testing also helps to ensure that all requirements are completed on schedule.

To ensure that students have the skills necessary for success, they must take a placement exam or meet appropriate prerequisites prior to registration for the following courses:

- MATH 82, 83, 84 or 86: Foundational Mathematics
- MATH 111: College Algebra
- MATH 113: Mathematics for Liberal Arts
- MATH 115: Introductory Statistics
- MATH 153: Introductory Statistics (co-requisite with 082)
- MATH 163: Introductory Algebra (co-requisite with 086)
- WRIT 100: Reading & Writing Processes for College Composition
- WRIT 101: College Composition
- WRIT 300: Composition & Research.

The University offers foundational courses for students who need additional support to be successful. A primary reason why students should take the placement exams early in their academic career is that a delay in taking the preparatory courses can also delay graduation.

New students who require one or more mathematics courses for their UBalt undergraduate degree may be exempted from the mathematics placement testing if they meet certain criteria:

- successful completion, with a grade of C or better, within the past three years of foundational/developmental mathematics equivalent to UBalt MATH 83 or 84: Foundational Mathematics at a previous institution of higher education
or
- transfer into UBalt of college-level elective mathematics credit from either courses successfully completed at another institution of higher education or from CLEP
or
- successful completion, with a grade of B or better, within the past three years of high school courses in calculus, precalculus, algebra II, trigonometry, geometry or statistics/statistical analysis
or
- an SAT score in mathematics of 500 or higher, if the score is no more than three years old.

In all of the above cases, coursework taken at another institution will be evaluated by the mathematics coordinator or the director of the foundational mathematics program to determine if a student can be directly enrolled into credit-bearing mathematics or if a placement exam will be required. If a placement exam is required, the student may be placed into MATH 83 or 84 or MATH 82/153 or MATH 86/163.

Newly admitted students meet with their adviser to determine which credit-bearing mathematics course they will need (e.g., MATH 111, 113 or 115 or equivalents) prior to course registration. Students who enroll in a credit-bearing mathematics course and are not successful are required to repeat the credit-bearing course but do not need to take MATH 83 or 84 or another foundational course. Students may opt to do so but should also consult with financial aid to determine if they would be eligible for aid.

Process Notes

Students admitted to UBalt who meet the criteria listed above will have a developmental math exemption indicator placed on their student record. The developmental math exemption hold exempts the student from needing a placement test. The newly admitted students meet with their adviser to discuss their mathematics courses thus far and to determine which credit-bearing course they need according to program of study.

The mathematics program collects course descriptions on a regular and recurrent basis from feeder community colleges to determine which are comparable to MATH 83 or 84. All other courses are evaluated on a case-by-case basis.

ADVISING FOR FIRST-YEAR STUDENTS

Academic Center, Room 209

Tel: 410.837.4186

Students entering the University as first-year students (with 29 college credits or fewer) are assigned an adviser. First-year students are required to meet with an adviser prior to registering for classes, when considering withdrawal from a class or making any other kind of rule change, and when preparing to officially apply for a major field of study. For advising appointments, students should contact the advisor indicated for them in the MyUBalt portal.

Students admitted as freshmen may declare a major when they successfully complete a minimum of 24 credits of coursework at UBalt with a 2.0 average or higher and have met all minimum standards for entrance into the chosen major. Students are required to declare a major by the time they have completed 45 credits. Students admitted as first-year students who have not completed their lower-division General Education courses in writing and mathematics within the first 45 credits may register for

subsequent semesters only with permission of the academic adviser. Students with fewer than 24 credits may register for 300- and 400-level courses with permission of an adviser.

PLACEMENT FOR COURSES

Placement for Lower-Division General Education Courses

The University of Baltimore requires students to have their skills assessed in reading, writing and mathematics. All first-year undergraduate students are required to take a placement exam or meet appropriate prerequisites prior to registration and will be notified of testing dates. Transfer students who have satisfied Maryland Higher Education Commission General Education Program requirements in composition and/or mathematics at another college or university are exempt from placement testing for lower-division General Education courses in the satisfied area(s). After their first semester, they will not be permitted to register for any courses without permission until the required lower-division General Education courses in writing and mathematics have been successfully completed. Transfer students who need to take placement tests should contact the Office of Academic Foundations and Transitions at 410.837.4186 or 410.837.5915. Students with current documentation of disabilities will be eligible for accommodations, when appropriate. Placement scores are valid for two years in accordance with state guidelines.

Placement Tests Taken at Another Institution

Students who have taken placement tests identical to the placement tests used at UBalt but at another institution within the last two years may request that those test results be used to place them in the appropriate UBalt courses. Students must provide documentation of any test results that are less than two years old to the Office of Transitions and Community Engagement, which will determine placement based on UBalt's current required scores.

Retest Policy

Students are allowed one retest attempt for the mathematics placement test. A student may retest for mathematics no sooner than two weeks after the initial test date. During that time, students are encouraged to seek additional assistance and preparation through the Mathematics Learning Center.

Foundational Course Repeat Policy

Students are required to earn a passing grade (C- or better) in any foundational course to progress into the next course. Students who do not earn a passing grade are allowed no more than a total of three attempts. Since MATH 82, 83, 84 and 86 grades are not computed into the GPA, students who repeat one of these courses should not file repeat/replace course forms. If, after three attempts, the student still has not achieved a passing grade, the student will be barred from further enrollment at UBalt for no less than one full regular semester. A student wishing to continue at UBalt at a later date must work with an appropriate adviser to create a plan for addressing the relevant academic issues, following a plan approved by the adviser or the appropriate dean. Once the conditions of the plan are fulfilled, the student may submit a request for reinstatement to the appropriate dean. If approved, the student may be granted permission to register for classes in the next academic semester.

Students should refer to the [Continuous Enrollment/Leave of Absence](#) section of this catalog regarding the amount of time that they may stop out for this purpose. Students who have been out for more than two consecutive semesters, excluding summer and winter sessions, must also reapply for admission.
